From memes to resumes, fairy tales to researched arguments, in a striking full-color visual design, The Bedford Book of Genres invites students to unpack how genres work in order to experiment with their own compositions. After capturing the imagination of instructors and students in its successful first edition, the second edition incorporates extensive reviewer feedback to better teach students the rhetorical analysis skills they need to read and compose in any situation. To start the text, the Guide now includes a new Part One that lays out the book's key concepts--rhetorical situation, the elements of a genre, and multimodal composing--and a substantially revised Part Two with examples arranged by academic, workplace, and public contexts. Throughout the text, Guided Readings provide opportunities to analyze the rhetorical situations and conventions of common public and academic genres, while Guided Process sections follow the decisions that five real students made as they worked in multiple genres and media. With a range of readings from short visual arguments to longer, more complex pieces, the Reader gives students a wealth of sources, models, and inspiration for their own compositions. Now available with Launchpad for The Bedford Book of Genres, the second edition offers a compelling digital

After the success of 2017's *Visual Thinking*, the author noticed that people enjoy discovering how easy it is to use drawings in business communication. But they still have no guide to satisfy their desire to tell a visual story in a very simple way. That is why the author has now written *Visual Doing*. This book will fulfil this desire, not by drilling deeper

into the advice in the first book, but by "undeeptening" Chapters 3 and 4. These chapters, both about drawing in visual business settings, are now broken down into ready-to-implement skills and tools. Visual Doing will improve your visual craftsmanship and broaden your skillset. It's a practical and accessible handbook for incorporating visual thinking into your daily business and communication. The author leads you through a new range of exercises, techniques and subjects which will help you to tell your own visual story. It takes a look at these subjects from different perspectives: "me as an individual", "we as a team" and "us as a company". It helps you to clarify complex information, pitch innovative strategies and foster a visual culture within your organisation. Learn how to show and share your ideas in a fun, clear and compelling way so you can inspire, engage and activate yourself and others.

Some are visible, some are hidden--but all are underrepresented in media and popular culture. Now, just in time for the thirtieth anniversary of the Americans with Disabilities Act, activist Alice Wong brings together an urgent, galvanizing collection of personal essays by contemporary disabled writers. There is Harriet McBryde Johnson's "Unspeakable Conversations," which describes her famous debate with Princeton philosopher Peter Singer over her own personhood. There is columnist s. e. smith's celebratory review of a work of theater by disabled performers. There are original pieces by up-and-coming authors like Keah Brown and Haben Girma. There are blog posts, manifestos, eulogies, and testimonies to Congress. Taken together, this anthology gives a glimpse of the vast richness and complexity of the disabled experience, highlighting the passions, talents, and everyday lives of this community. It invites readers to question their own assumptions and understandings. It celebrates and documents disability culture in the now. It looks to the future and past with hope and love"--

The New York Times bestseller that gives readers a paradigm-shattering new way to think about motivation from the author of *When: The Scientific Secrets of Perfect Timing* Most people believe that the best way to motivate is with rewards like money—the carrot-and-stick approach. That's a mistake, says Daniel H. Pink (author of *To Sell Is Human: The Surprising Truth About Motivating Others*). In this provocative and persuasive new book, he asserts that the secret to high performance and satisfaction—at work, at school, and at home—is the deeply human need to direct our own lives, to learn and create new things, and to do better by ourselves and our world. Drawing on four decades of scientific research on human motivation, Pink exposes the mismatch between what science knows and what business does—and how that affects every aspect of life. He examines the three elements of true motivation—autonomy, mastery, and purpose—and offers smart and surprising techniques for putting these into action in a unique book that will change how we think and transform how we live.

## The Art of Doodle Words

Anxiety in children is on the rise, and recent research has

# Read Book 21 Doodle Days A Visual Learning Workbook For Teachers Parents Kids

uncovered a link between highly imaginative children and anxiety. Using engaging illustrations and fun activities based in cognitive behavioral therapy (CBT), one of the most proven-effective and widely used forms of therapy today, this Instant Help workbook presents a unique approach to help children harness the power of their imaginations to reduce anxiety and build self-esteem. Millions of children suffer from anxiety, which can be extremely limiting, causing kids to miss school, opt out of activities with friends, and refuse to speak or participate in a variety of situations. Furthermore, children who are diagnosed with anxiety or brought into therapy often feel embarrassed about not being "normal." Focusing on the problem of anxiety can stress kids out and make them feel ashamed. But when the focus is on their strengths and their vivid imaginations, children are empowered to face their anxiety head-on. The Anxiety Workbook for Kids is a fun and unique workbook grounded in evidence-based CBT and designed to help children understand their anxious thoughts within a positive framework—a perspective that will allow kids to see themselves as the highly imaginative individuals they are, and actually appreciate the role imagination plays in their anxiety. With this workbook, children will learn that, just as they are capable of envisioning vivid scenarios that fuel their anxiety, they are capable of using their imagination to move away from anxious thoughts and become the boss of their own worries. With engaging CBT-based activities, games, and illustrations—and with a focus on imagination training and developing skills like problem solving, assertiveness, positive thinking, body awareness, relaxation, and mindfulness—this book will help kids stand up to worry and harness the power of their imagination for good.

## Strategy to See

A step-by-step guide for teachers to the benefits of visual note-taking and how to incorporate it in their classrooms. We've come a long way from teachers admonishing students to put away their drawings and take traditional long-form notes. Let's be honest: note-taking is boring and it isn't always the most effective way to retain information. This book is a guide for teachers about getting your students drawing and sketching to learn visually. Whether in elementary school or high school, neuroscience has shown that visual learning is a very effective way to retain information. The techniques in this book will help you work with your students in novel ways to retain information. Visual note-taking can be used with diverse learners; all ages; and those who have no drawing experience. Teachers are provided with a library of images and concepts to steal, tweak, and use in any way in their classrooms. The book is liberally illustrated with student examples from elementary and high school students alike.

**A Whole New Way to Empower Women** Do you believe in miracles? I do, and the creation of this book is one of those miracles. Three years ago, I worked in a corporate job with a small baby and a three-year old at home. I worked all day in a stressful sales job and then rushed home every night to spend a few precious moments with my family. I felt stressed, miserable and under appreciated, overworked. I was failing at every part of my life. I knew I needed to get out of my situation, but I had no idea how. And even less of an idea of what to do once I got there. Looking back, I realize that I was (and still am) on an amazing spiritual journey to reconnect with myself, my spirit and my true desires. Once I set this new intention, things began to unfold with ease. The first thing I realized was that I was spending WAY too much time in my head - processing information, making logical decisions and then taking action. I was spending almost NO time in my heart - feeling, watching, listening and slowing down. As someone who prided myself as an action taker, it was hard at

first to slow down and just listen to my body, my intuition, the sound of the wind blowing through the trees. But once I did, it was wonderful! I found myself again, and began to remember my passions. I could see a wonderful new future in store as an entrepreneur. This Soulful Mandala Coloring Book came together magically with total ease. I believe you were meant to have it. And the simple act of coloring and doodling is a perfect way to get out of your head and into your heart. This was made for you. I hope you enjoy it. What did Einstein, JFK, Edison, Marie Curie, and Henry Ford have in common? They were all inveterate doodlers. These powerhouse minds knew instinctively that doodling is deep thinking in disguise - a simple, accessible, and dynamite tool for innovating and solving even the stickiest problems. Sunni Brown's mission is to bring the power of the Doodle to the rest of us. She leads the Revolution defying all those parents, teachers, and bosses who say Stop doodling! Get serious! Grow up! She overturns misinformation about doodling, demystifies visual thinking, and shows us the power of applying our innate visual literacy. Doodlers of the world, unite! The power of the pen awaits you. 'There's a reason why so many innovative companies use Sunni's techniques for visual literacy, and it's not just because they want to have fun. These methods offer consistently better thinking and in the process deliver happiness as well.' Tony Hsieh, Zappos.com. It nudges the mind to discover different angles and hidden connections. In the long run - and especially around new media - expressing oneself in raw text might not stand up in the face of artistic, spatial, and emotive text. Sunni has found a way to validate and systematize a new language that enables thinking on a whole new level.' Robert McKee, author of Story

### Brian Blomerth's Bicycle Day

A Hula-Hooping moose, a badger with a bumblebee umbrella, a rabbit in a cashmere sweater, and a very wet bear star in this unpredictable and laugh-out-loud picture book in which having fun gets the best of a grumpy bear. It looks like a wet and dreary day for Bear and his trio of friends. How could he possibly have fun when he is soaked? But Badger, Rabbit, and Moose don't seem to mind. In fact, Moose can still hula hoop! And it looks like so much fun. Might Bear like to try? Here is a story that shows that fun is not dependent on sunshine and blue skies. In fact, it might be more fun to be soaked!
