The highly anticipated continuation of Riad Sattouf's internationally acclaimed, #1 French bestseller, which was hailed by The New York Times as "a disquieting yet essential read" In The Arab of the Future: Volume 1, cartoonist Riad Sattouf tells of the first years of his childhood as his family shuttles back and forth between France and the Middle East. In Libya and Syria, young Riad is exposed to the dismal reality of a life where food is scarce, children kill dogs for sport, and his cousins, virulently anti-Semitic and convinced he is Jewish because of his blond hair, lurk around every corner waiting to beat him up. In Volume 2, Riad, now settled in his father's hometown of Homs, gets to go to school, where he dedicates himself to becoming a true Syrian in the country of the dictator Hafez Al-Assad. Told simply yet with devastating effect, Riad's story takes in the sweep of politics, religion, and poverty, but is steered by acutely observed small moments: the daily sadism of his schoolteacher, the lure of the black market, with its menu of shame and subsistence, and the obsequiousness of his father in the company of those close to the regime. As his family strains to fit in, one chilling, barbaric act drives the Sattoufs to make the most dramatic of changes. Darkly funny and piercingly direct, The Arab of the Future, Volume 2 once again reveals the inner workings of a tormented country and a tormented family, delivered through Riad Sattouf's dazzlingly original talent.

### **Back to the Future**

The book examines questions of identity, ethnicity, sovereignty and insurgency in northeastern India, and especially on Assam and its neighbourhood. Written by an academic-journalist, the various articles

situate these in their larger social, economic, political and, above all, historical context, the last being especially important in their becoming a part of colonial India relatively late, well after colonial control was established in the rest of India. Based on close, ground level experience involving extensive travel and interaction with the people, this collection is the result of a long journalistic career spanning nearly 50 years in the northeast region. Written in simple, lucid language, the essays cover a range of themes including culture, belief, and identity; homeland and language politics; and insurgency and separatism. The volume also achieves a uniquely dual historical value - while the articles themselves include a lot of historical information tracing the roots of the various issues discussed, the articles themselves range from 1974 to 2010, providing the modern reader with a series of historical moments captured in their immediacy. Of interest to students, academics, researchers in politics, peace & conflict studies, politics, sociology, history, language, those interested in northeast India, policy-makers, cultural studies, etc.

How does an urban community come to terms with the loss of its future? The former socialist model city of Hoyerswerda is an extreme case of a declining postindustrial city. Built to serve the GDR coal industry, it lost over half its population to outmigration after German reunification and the coal industry crisis, leading to the large-scale deconstruction of its cityscape. This book tells the story of its inhabitants, now forced to reconsider their futures. Building on recent theoretical work, it advances a new anthropological approach to time, allowing us to investigate the postindustrial era and the futures it has supposedly lost.

Start With the Future and Work Back: A Heritage Management Manifesto is a lively, often amusing, but seriously perceptive take on the business of history and the history of business. The book explores The History Factory's role in creating and shaping the global heritage management industry, drawing on its work with a broad array of corporations and the original business characters the firm has served since its founding in 1979. At its heart, the book is a 21st century survey of innovative business leadership that builds on the stories of courageous leaders at corporations willing to dig deeply into their inventory of experiences to support authentic communications, establish credible brand positioning, and improve employee retention and recruitment. Iconic examples of inside-out business positioning using heritage range from the sartorial remake of Brooks Brothers to stories of innovation told by company employees at Subaru; from New Balance's immersive global headquarters exhibit that aptly conveys its dynamic culture to the creation and maintenance of the Wrigley archive. ## **Back to the Future: Who Is Marty Mcfly?**

### **Looking Back into the Future**

A moving account of resilience, hope, fear and mortality, and how these things resonate in our lives, by actor and advocate Michael J. Fox. The entire world knows Michael J. Fox as Marty McFly, the teenage sidekick of Doc Brown in Back to the Future; as Alex P. Keaton in Family Ties; as Mike Flaherty in Spin City; and through numerous other movie roles and guest appearances on shows such as The Good Wife and Curb Your Enthusiasm. Diagnosed at age 29, Michael is equally engaged in Parkinson's advocacy work, raising global awareness of the disease and helping find a cure through The Michael J. Fox Foundation for Parkinson's Research, the world's leading non-profit funder of PD science. His two previous bestselling memoirs, Lucky Man and Always Looking Up, dealt with how he came to terms with the illness, all the while exhibiting his iconic optimism. His new memoir reassesses this outlook, as events in the past decade presented additional challenges. In No Time Like the Future: An Optimist Considers Mortality, Michael shares personal stories and observations about illness and health, aging, the strength of family and friends, and how our perceptions about time affect the way we approach mortality. Thoughtful and moving, but with Fox's trademark sense of humor, his book provides a vehicle for reflection about our lives, our loves, and our losses. Running through the narrative is the drama of the medical madness Fox recently experienced, that included his daily negotiations with the Parkinson's disease he's had since 1991, and a spinal cord issue that necessitated immediate surgery. His challenge to learn how to walk again, only to suffer a devastating fall, nearly caused him to ditch his trademark optimism and "get out of the lemonade business altogether." Does he make it all of the way back? Read the book.

### **William Shakespeare's Get Thee Back to the Future!**

From the New York Times columnist and bestselling author of Bad Religion, a powerful portrait of how our

turbulent age is defined by dark forces seemingly beyond our control Today the Western world seems to be in crisis. But beneath our social media frenzy and reality television politics, the deeper reality is one of drift, repetition, and dead ends. The Decadent Society explains what happens when a rich and powerful society ceases advancing—how the combination of wealth and technological proficiency with economic stagnation, political stalemates, cultural exhaustion, and demographic decline creates a strange kind of “sustainable decadence,” a civilizational languor that could endure for longer than we think. Ranging from our grounded space shuttles to our Silicon Valley villains, from our blandly recycled film and television—a new Star Wars saga, another Star Trek series, the fifth Terminator sequel—to the escapism we’re furiously chasing through drug use and virtual reality, Ross Douthat argues that many of today’s discontents and derangements reflect a sense of futility and disappointment—a feeling that the future was not what was promised, that the frontiers have all been closed, and that the paths forward lead only to the grave. In this environment we fear catastrophe, but in a certain way we also pine for it—because the alternative is to accept that we are permanently decadent: aging, comfortable and stuck, cut off from the past and no longer confident in the future, spurning both memory and ambition while we wait for some saving innovation or revelations, growing old unhappily together in the glowing light of tiny screens. Correcting both optimists who insist that we’re just growing richer and happier with every passing year and pessimists who expect collapse any moment, Douthat provides an enlightening diagnosis of the modern condition—how we got here, how long our age of frustration might last, and how, whether in renaissance or catastrophe, our decadence might ultimately end.
