The Commanding Heights is about the most powerful political and economic force in the world today -- the epic struggle between government and the marketplace that has, over the last twenty years, turned the world upside down and dramatically transformed our lives. Now, the Pulitzer Prize-winning author of *The Prize* joins with a leading expert on the new marketplace to explain the revolution in ideas that is reshaping the modern world. Written with the same sweeping narrative power that made *The Prize* an enormous success, *The Commanding Heights* provides the historical perspective, the global vision, and the insight to help us understand the tumult of the past half century. Trillions of dollars in assets and fundamental political power are changing hands as free markets wrest control from government of the "commanding heights" -- the dominant businesses and industries of the world economy. Daniel Yergin and Joseph Stanislaw demonstrate that words like "privatization" and "deregulation" are inadequate to describe the enormous upheaval that is unfolding before our eyes. Along with the creation of vast new wealth, the map of the global economy is being redrawn. Indeed, the very structure of society is changing. New markets and new opportunities have brought great new risks as well. How has all this come about? Who are the major figures behind it? How does it affect our lives? The collapse of the Soviet Union, the awesome rise of China, the awakening of India, economic revival in Latin America, the march toward the European Union -- all are a part of this political and economic revolution. Fiscal realities and financial markets are relentlessly propelling deregulation; achieving a new balance between government and marketplace will be the major political challenge in the coming years. Looking back, the authors describe how the old balance was overturned, and by whom. Looking forward, they explore these questions: Will the new balance prevail? Or does the free market contain the seeds of its own destruction? Will there be a backlash against any excesses of the free market? And finally, *The Commanding Heights* illuminates the five tests by which the success or failure of all these changes can be measured, and defines the key issues as we enter the twenty-first century. *The Commanding Heights* captures this revolution in ideas in riveting accounts of the history and the politics of the postwar years and compelling tales of the astute politicians, brilliant thinkers, and tenacious businessmen who brought these changes about. Margaret Thatcher, Donald Reagan, Deng Xiaoping, and Bill Clinton share the stage with the "Minister of Thought" Keith Joseph, the broommaker's son Domingo Cavallo, and Friedrich von Hayek, the Austrian economist who was determined to win the twenty-year "battle of ideas." It is a complex and wide-ranging story, and the authors tell it brilliantly, with a deep understanding of human character, making critically important ideas lucid and accessible. Written with unique access to many of the key players, *The Commanding Heights*, like no other book, brings us an understanding of the last half of the twentieth century -- and sheds a powerful light on what lies ahead in the twenty-first century.

Focusing on a number of historical and literary personalities who were regarded with disdain in the aftermath of the 1917 revolution—figures such as Peter the Great, Ivan the Terrible, Alexander Pushkin, Leo Tolstoy, and Mikhail Lermontov—Epic Revisionism tells the fascinating story of these individuals' return to canonical status during the darkest days of the Stalin era. An inherently interdisciplinary project, Epic Revisionism features pieces on literary and cultural history, film, opera, and theater. This volume pairs scholarly essays with selections drawn from Stalin-era primary sources—newspaper articles, unpublished archival documents, short stories—to provide students and specialists with the richest possible understanding of this understudied phenomenon in modern Russian history. “These scholars shed a great deal of light not only on Stalinist culture but on the politics of cultural production under the Soviet system.”—David L. Hoffmann, Slavic Review

How does an illiterate singer produce a long oral epic? What is the origin of his "text", available only for a fleeting moment at its performance? How can a multifaceted oral performance be transformed into a book? The primary oral textualization and the secondary written codification of the Siri epic, 15,683 lines, are described in detail in the present volume on the basis of recent fieldwork among the speakers of Tulu, a Dravidian language, in southern Karnataka, India. The "oral author", Mr Gopala Naika, is one of the many talented singers of oral epics in Tulunaadu and a possession priest in rituals which use oral epics as their mythical charter and a source of mental therapy.

Farmers who live in fragile tropical hillsides often operate under severe resource constraints and face difficult tradeoffs when confronted with changes in production conditions. Using a bioeconomic linear programming model, this study simulates the effects of population, market, and technological changes on farmers' income and on their management of the natural resource in a hillside area of Central Honduras. The results show that economic growth and agricultural intensification are not necessarily adverse for fragile environments. In fact, farmer incomes would be much lower and degradation much higher if intensive agriculture had not been adopted. Such a result, however, must be framed within a complex set of conditioning factors, among which agroecology plays a fundamental role. Although the economic advantages of horticultural production are clear in the area studied, this strategy is not suited for all contexts. This report offers a series of policy recommendations that implicitly recognize such limitations, thereby helping to direct resources where they will have their greatest impact.
