### **Advanced Financial Accounting**

Learning Financial Accounting can often feel like learning a foreign language to students, in particular when terminology and procedure is piled on before core concepts are truly mastered. Introductory Financial Accounting for Business is an innovative approach that emphasizes critical thinking over the rote memorization of terms, such as “debits” and “credits”. The sequential learning model employed by the authors helps students see the bottom-line consequences of financial statements as it relates to the overall business, better preparing them for careers as accountants, entrepreneurs, and decision-makers. The authors focus initially on conceptual underpinnings -- the reasons why we approach procedures the way we do – rather than confusing students by front-loading the material with over-complicated details. Author Chris Edmonds has also created a highly popular and widely used series of video lectures, which engage students by clearly and charismatically going over each learning objective in a conversational style. These videos help reinforce important lessons and are always available for review. By developing this stronger foundation, students understand Accounting ideas more broadly and are able to ultimately learn procedural applications more quickly and accurately. With a straightforward writing style and highly engaging video lectures, this dynamic author team leads students down a streamlined learning path focused on critical thinking, clarity of concept, and applicability of material to the real world.

For Introductory Financial Accounting courses at the MBA level, and for rigorous undergraduate courses. Introductory Financial Accounting provides a unique and perfect blend of robust financial statement analysis with early statement of cash flows coverage. Marlene A. Plumlee, Ph.D, CPA, Associate Professor of Accounting at the University of Utah, authored Pearson's International Financial Reporting Standards supplement ISBN 013612304X for our Introduction to Financial Accounting 9th edition by Horngren. This IFRS Supplement discusses the general context of US Generally Accepted Accounting Principles (US GAAP) and International Financial Reporting Standards (IFRS) and provides background information about the use of US GAAP and IFRS and 'players' that will ultimately affect how and when IFRS will be adopted internationally. Included also is an overview of the conceptual frameworks that underlie the formation of US GAAP and IFRS. A comparison of two companies is offered, one that employs US GAAP to prepare its financial report and one the employs IFRS to prepare its financial report.

Financial accounting is generally thought of as a very precise science. This book seeks to dispel this myth. Even absent fraudulent manipulation, information contained in financial statements can be woefully misleading and incomplete. Written primarily for non-accounting students, small business owners, and advisers to small business, the book demonstrates how accounting information contained in financial statements both informs and misinforms statement users.

## **Introductory Accounting Exercise Workbook Combo Edition**

This text is intended for a first course in introductory financial accounting. It was updated to reflect current International Financial Reporting Standards (IFRS). For example, it reflects the recent change in IAS38, para. 98, allowing the use of multiple methods in amortizing intangible assets. It focuses on core Introductory Financial Accounting topics that match pre-requisite requirements for students advancing to Intermediate Financial Accounting. Excluded are advanced topics that are covered in Intermediate Financial Accounting, such as leases and bond amortization. The text takes a corporate approach (vs. beginning with a sole proprietorship emphasis and then converting to a corporate approach); this consistency throughout the book reduces confusion for the introductory student. The book covers all essential topics: the accounting cycle, merchandising, assigning costs to inventory, cash and receivables, property, plant and equipment, debt financing, equity financing, statement of cash flows, financial statement analysis, and proprietorships and partnerships. Additionally, this version of the open text is
