¿ A principles-level introduction to international economics that is accessible to all majors. This book is also suitable for readers interested in the field of international economics. ¿ International Economics uses a rich array of case studies to illuminate economic institutions and policies as well as recent developments in the global economy—without readers having to rely on a prerequisite knowledge of higher-level math. Further, the book's flexible approach—with self-contained chapters and comprehensive coverage—allows instructors to

adapt the text easily to a wide range of syllabi. The sixth edition preserves the organization and coverage of the fifth edition and adds a number of updates and enhancements. All tables and graphs have been updated and every chapter begins with a list of student learning outcomes. Chapter 13, The United States in the World Economy, is heavily revised and refocused towards U.S. international economic relations, including NAFTA, but adds material on other trade agreements, including a new case study on preferential agreements such as the African Growth and Opportunity Act. Available with the award-winning MyEconLab! MyEconLab is a powerful assessment and tutorial system that works hand-in-hand with International Economics. MyEconLab includes comprehensive homework, quiz, test, and tutorial options, where instructors can manage all assessment needs in one program! ## Multinational Business Finance

Valuation: The Art and Science of Corporate Investment Decisions is the first textbook to offer an integrated approach to both project and enterprise valuation. The text goes beyond standard DCF analysis by including additional valuation methods commonly used in practice, such as comparables, simulations (including Crystal Ball®), and real options. In addition, discussions are considered against the backdrop of other quantitative and qualitative corporate issues that affect valuation, including:

- Organizational structure and incentives: The text examines how the corporate decision-making process as well as the incentive system can positively or negatively affect valuation.
- Strategic analysis and real options: Real options are presented as a tool to complement executive intuition and provide a more disciplined evaluation process that focuses on creating value.
- Risk management and hedging: Risks associated with interest rate fluctuations, variable foreign exchange rates, and fluctuating commodity prices can create hedging and risk management opportunities that affect value.

Financing: The ability to secure attractive financing terms is an important source of value, and readers should understand how financing opportunities influence the value of an investment opportunity.

Irrational behavior: The text examines how limitations in cognitive abilities and biases in assessing abilities of key players can affect valuation.
