of an invention is to file a provisional patent application (PPA), a shortened version of a patent application. This book takes readers step-by-step through the process of drafting and filing a PPA within 24 hours, explaining how to:

- § ·search for prior art
- § ·organize data
- § ·use charts and tables
- § ·create illustrations
- § ·assemble the PPA

Patent Pending in 24 Hours also discusses the advantages and limitations of, and alternatives to, PPAs, and covers what happens after submitting one to the Patent and Trademark Office, including:

- § ·what happens if an invention is modified
- § ·whether an inventor needs a nondisclosure agreement when pitching a creation
- § ·how to mark an invention with "Patent Pending"

The 4th edition provides the latest regulations, case law and patent-searching information, as well as new samples of provisional patent applications.

Rules of Patent Drafting

The Color of Creatorship examines how copyright, trademark, and patent discourses work together to form American ideals around race, citizenship, and property. Working through key moments in intellectual property history since 1790, Anjali Vats reveals that even as they have seemingly evolved, American understandings of who is a creator and who is an infringer have remained remarkably racially conservative and consistent over time. Vats examines archival, legal, political, and popular culture texts to demonstrate how intellectual properties developed alongside definitions of the "good citizen," "bad citizen," and intellectual labor in racialized ways. Offering readers a theory of critical race intellectual property, Vats historicizes the figure of the citizen-creator, the white male maker who was incorporated into the national ideology as a key contributor to the nation's moral and economic

development. She also traces the emergence of racial panics around infringement, arguing that the post-racial creator exists in opposition to the figure of the hyper-racial infringer, a national enemy who is the opposite of the hardworking, innovative American creator. *The Color of Creatorship* contributes to a rapidly-developing conversation in critical race intellectual property. Vats argues that once anti-racist activists grapple with the underlying racial structures of intellectual property law, they can better advocate for strategies that resist the underlying drivers of racially disparate copyright, patent, and trademark policy.

This study examines the emergence of new forms of Islamic spirituality in Indonesia identified as Majlis Dhikr. These Majlis Dhikr groups have proliferated on Java in the last two decades, both in urban and rural areas, and have attracted followers from a wide social background. The diverse aspects of these Majlis Dhikr groups - their rituals, teachings and strategies of dissemination as well as the popular understanding of these rituals and their contestation by critics and opponents - are examined in detail and illustrated by reference to three particular groups - Salawat Wahidiyat, Istighathat Ihsaniyyat and Dhikr al-Ghafilin each of which has its own distinctive features and notable religious leadership. These Majlis Dhikr groups regard their activities as legitimate ritual practices that are in accordance with the legacy of Islamic Sufism based on the interpretation of the Qur'anic and Prophetic tradition.

their own. A patent is a temporary government-issued monopoly that prevents others from making, using, or selling your product. Holding a patent on an invention grants you the authority to issue licenses to others (individuals or companies) who want to make and sell your product. This book is designed to give you a solid fundamental understanding of this involved (and at times, complicated) process. If your invention is a good one, then you're off to a running start, but 95% of the potential for success hinges on how you go about procuring your patent and finding partners to help you make and sell your product. This book will help you better understand the patenting process by providing step-by-step instructions on the how, when, and where of patenting.

How to Make Patent Drawings

Think you need a patent? Think again. Many of the products Stephen Key has licensed required no intellectual property protection whatsoever, yet have made millions in royalties. But Key also knows what it takes to protect a big idea. Years ago, after reading about how medication bottles rarely contain enough space for the information that needs to be printed on them, he was inspired to develop an innovative label technology. The Spinformation rotating label has been licensed on products the world over, is protected by 20 U.S. and international patents, and has received more than 13 industry awards. To put it simply: Key knows how to use intellectual property to profit. This book will teach you how to:

- Get a licensing contract with or without intellectual property
- Write a provisional patent application that stops others from stealing your idea
- Find and hire a killer patent attorney (they are not all created equal!)

How to Patent an Idea Or Invention

Revolutionary ideas are often just that - ideas. To realize your vision of bringing an innovation to life you'll need the knowledge and confidence to protect those ideas from infancy to realization. This game has the highest of stakes and you need an unfair advantage to give you the best possible chance to win. From Shark Tank to Fortune 500 companies, patents play an integral role in value creation, securing venture capital, and acquisition. If you are trying to bring something new into this world, whether you are an entrepreneur or the CEO of a multi-national corporation, your ability to play the patent game could be the difference between success and failure. You need information, but you don't want to go to law school, read a dry textbook, or pay a patent attorney hundreds of dollars an hour to learn what you need to make smart decisions. The Patent Game will give you this critical information efficiently and effectively. The first half

of the book covers the basics of patents, often with game-related analogies, to help you define winning for your company or innovation. The second half will help guide you to one of eighteen different patent strategies that might be the ideal approach for your innovation. Each strategy has an introduction, play-by-play with diagrams, and a practical real-world example. The author, Vance VanDrake, is a patent attorney, law firm partner, and co-founder of multiple early stage and venture-backed companies. He has worked with hundreds of startups and technologists to add over a billion dollars in value to these ventures. He created The Patent Game to serve as an easy-to-understand, comprehensive guide to developing a patent strategy that fits your business needs. Don't let someone else control the pieces on the board - take control of your own destiny and make your vision a reality.
