What Hedge Funds Do provides a needed complement to journalistic accounts of the hedge fund industry, to deepen the understanding of non-specialist readers such as policymakers, journalists, and individual investors. What do hedge funds really do? These lightly-regulated funds continually innovate new investing and trading strategies to take advantage of temporary mispricing of assets (when their market price deviates from their intrinsic value). These techniques are shrouded in mystery, which permits hedge fund managers to charge exceptionally high fees. While the details of each funds' approach are carefully guarded trade secrets, this book draws the curtain back on the core building blocks of many hedge fund strategies Beyond the book's instructional goals, What Hedge Funds Do provides a needed complement to journalistic accounts of the hedge fund industry, to deepen the understanding of non-specialist readers such as policymakers, journalists, and individual investors. It is written by a fund practitioner and computer scientist (Balch), in collaboration with a public policy economist and finance academic (Romero).

Design-build is a powerful project delivery approach. But how to actuate such power and deliver the design-build promise? This is what this book is all about. It provides the reader with cutting-edge knowledge, know-how, techniques, trade secrets, and best practices to deliver design-build projects in a safe and controlled manner. It covers the entire design-build process— from building the design-build team and winning the designbuild tender competition, to project management, selecting the best design-build solution, and the sound planning of designbuild activities. To this end, the book introduces a totally new and innovative design-build planning methodology, namely, the SAFEDB-methodology. The SAFEDB-methodology consists of three key components: develop design-build solutions, fast-tack design-build activities, and control design-build work progress. The first component is concerned

with evaluating candidate design-build options and selecting the most effective design-build solution. The second component looks deep into overlapping design and construction activities and introduces an effective overlapping strategy enabling maximum safe schedule compression. The last methodology component focuses on enhancing the design-build schedule reliability by taking into account potential schedule branching and rework loops in a structured and proactive manner. A range of real-world practical examples of the methodology application are provided for clarity and immediate use by the readers. The book is meant for the design-build contractors, designers, and owners; for the professionals and the academics, those new to the design-build arena or the seasoned design-builders.

Little Book of Trauma Healing

The Unknown Cultural Revolution challenges the established narrative of China's Cultural Revolution, which assumes that this period of great social

upheaval led to economic disaster, the persecution of intellectuals, and senseless violence. Dongping Han offers a powerful account of the dramatic improvements in the living conditions, infrastructure, and agricultural practices of China's rural population that emerged in this period. Drawing on extensive local interviews and records in rural Jimo County, in Shandong Province, Han shows that the Cultural Revolution helped overthrow local hierarchies, establish participatory democracy and economic planning in the communes, and expand education and public services, especially for the elderly. Han lucidly illustrates how these changes fostered dramatic economic development in rural China. The Unknown Revolution documents a neglected side of China's Cultural Revolution, demonstrating the potential of mass education and empowerment for radical political and economic transformation. It is a bold and provocative work, which demands the attention not only of students of contemporary Chinese history but of all who are concerned with poverty and inequality in the world today.

The Preschool Letters and Notes to Parents Book

One famous target of Progressive Era attempts to rein in monopolistic big business was the eastern Sugar Trust. Less known is how federal regulators also tried to break monopoly control over beet sugar in the West by going after the Utah-Idaho Sugar Company, a business supported and controlled by the Latter-day Saints church and run by Mormon authorities. As sugar beet agriculture boomed, the Mormon church's involvement led directly to monopolistic practices by Utah-Idaho Sugar and to federal investigations. Church leaders encouraged members, a majority population in much of the intermountain West, to patronize the company exclusively, as suppliers and consumers. As early as 1890, Mormon church president Wilford Woodruff had called missionaries to raise money for the fledgling company and asserted divine inspiration for church support. Utah-Idaho bridged the cooperative, theocratic, self-sufficient economic model of nineteenth-century Mormonism and the integration of the Mormon West into the national market economy. Religion, Politics, and Sugar shows, through the example of an important western business, how national commercial, political, and legal forces in the early twentieth century came west and, more specifically, how they affected the important role the Mormon church played in economic affairs in the region.

Archangels and Ascended Masters is a thoroughly researched book in a lively encyclopedia format, listing 77 divinities from Greek, Roman, Egyptian, Asian, Babylonian, Tibetan, Buddhist, Celtic, Theosophical, New Age, Catholic, Cabalistic, Jewish, and Christian roots. Doreen carefully studied and wrote about the history of each deity, what role they serve today, how they can help us with specific life problems, and how to call upon each one. Doreen spent time in communication with each divinity to ensure that the being was reachable, and to discover the essence of his or her personality and current dealings with the world—and within these pages, she includes a channeled message or impression from each of the ascended masters and archangels. Many of her channelings were conducted at power points throughout the world, such as Stonehenge in England; the Irish coast; Kona, Hawaii; and the New Zealand rain forest. A comprehensive chart lists a number of life situations, such as Addictions, Finding a Soulmate, Emergency Money, Healing Physical Illness, and various personal and family concerns. Beneath each topic is the list of whom to call upon when dealing with that particular challenge. Doreen also includes prayers to call upon multiple divinities for specific issues such as "increased clairvoyance" and "resolving conflict."

American Slavery as it is

In 2007 English Heritage commissioned initial research into links with transatlantic slavery or its abolition amongst families who owned properties now in its care. This was part of the commitment by English Heritage to commemorate the bicentenary of the abolition of the British transatlantic slave trade with work that would make a real difference to our understanding of the historic environment in the longer term. The research findings and those of other scholars and heritage practitioners were presented at the 'Slavery and the British Country House' conference which brought together academics, heritage professionals, country house owners and community researchers from across Britain to explore how country houses might be reconsidered in the light of their slavery linkages and how such links have been and might be presented to visitors. Since then the conference papers have been updated and reworked into a cutting edge volume which represents the most current and comprehensive consideration of slavery and the British country house as yet undertaken.
