and learn from. Nursing Interventions are grouped according to health care setting to make it easier to determine the appropriateness of individual interventions for different patient populations. All-in-one Student Activities workbook is included in a perforated section at the back of the book and includes NCLEX-style multiple-choice questions as well as the new NCLEX-style questions (short-answer and fill-in-the-blank) to help students review chapter content and prepare for the NCLEX exam (answers are found in the Instructor's Resource Manual). New chapter on end-of-life care addresses essential content for both institutional and the home setting, including information on palliative and hospice care, pain management, and how belief systems affect the dying person and caregivers. Delegation, leadership, and management content is integrated throughout to address the changing role of LPN/LVNs. Delegation Considerations boxes address such topics as restraints, elder abuse, and end-of-life care as related to responsibilities of nursing assistants and other health care workers who are supervised by LPN/LVNs. Second color added to the design adds visual appeal and helps to emphasize key content. Cultural Considerations boxes help students understand how to provide culturally sensitive patient care. Complementary and Alternative Therapy boxes address popular therapies that are used in pain relief and other treatments. Patient

Widely respected yoga teacher and author Richard Rosen draws on ancient yoga encyclopedias to explain how yoga was practiced before it became popular in the West. He compares the three main existing sources known to yoga scholars to describe how complex and rich the practice of yoga once was. It included systematic teachings on personal hygiene, good health, and good relationships, and other practices of yoga that went far beyond just the physical postures. Each section of the book offers a guided practice session of ancient poses and breathing techniques to enable readers to connect to the roots of their yoga and to offer a framework from which to understand the sequences they use in their regular sessions.

In the Kamakura period, Myoe Shonin (1173–1232) was a leader of Nara Buddhists who sought to revitalize traditional Buddhism in Japan. In his teaching, Myoe specially emphasized the value of the visions that could be achieved through meditation; and in his practice, he kept and occasionally illustrated a diary of his own visions and significant night dreams. The autograph copy of this remarkable document still exists, although some pages have been scattered among collectors. George J. Tanabe, Jr., here presents in English the most comprehensive compilation of the diary in any language. Moreover, his study of Myoe's life and teachings provides both a context within which the diary can be understood and a view of the often doctrinally contentious world of Kamakura Buddhism.

"Public management is emerging as a discipline separate from public administration. Public management, as distinguished from public administration, focuses on strategy rather than on managerial processes, on relations between organizations rather than within them, and on the intersection of public policy and management. Public Management: The State of the Art gathers leading researchers and theorists from various schools of interpretation to convey the latest theories and research and to explore what public management is and what it can be." "The authors assess the state of current public management theory, reveal the effectiveness and strategic dimensions of public management practice, and show how the discipline of public management interacts with policy design and politics. In addition, they examine the implications of technological innovation, including management information systems, and chart new directions for public management theory and research."--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. Noting that "Christians in the 20th century have not been able to make up their minds whether God and our corporate lives have anything to do with each other," Dyrness explores the century's theological trends. Citing the impact of contemporary hermeneutics, Dyrness shows how the Bible still functions as a master narrative wherein Christians can find themselves. Dyrness addresses various aspects of contemporary culture, constructing a theology of embodiment that connects culture and worship in concrete ways.

In this new contribution to moral theory, Todd Lekan argues for a pragmatist conception of morality as an evolving, educational, and fallible practice of everyday life. Drawing on the work of John Dewey, Lekan asserts that moral norms are neither timeless truths nor subjective whims, but habits transmitted through practices. Like the habits that make up medicine or engineering, moral habits are subject to rational evaluation and change according to new challenges and circumstances. This pragmatic interpretation of morality provides a way out of the conundrum of relativism and absolutism. Building on classical American philosophy to address current philosophical concerns, Lekan's theory revises our basic understanding of moral life and the place of theorizing within that life. Making *Morality* will prove of great interest to ethical theorists, as it enjoins them to measure theoretical inquiries by how well they produce intellectual tools for problem-solving in dynamic, complex communities.
