A Guide for the Idealist is a must for young professionals seeking to put their idealism to work. Speaking to urban and regional planners and those in related fields, the book provides tools for the reader to make good choices, practice effectively, and find meaning in planning work. Built around concepts of idealism and realism, the book takes on the gap between the expectations and the constraints of practice. How to make an impact? How to decide when to compromise and when to fight for a core value? The book advises on career "launching" issues: doubt, decision-making, assessing types of work and work settings, and career planning. Then it explains principled adaptability as professional style. Subsequent chapters address early-practice issues: being right, avoiding wrong, navigating managers, organizations and teams, working with mentors, and understanding the career journey. Underpinning these dimensions is a call for planners to reflect on what they are doing as they are doing it. The advice provided is based on the experience of a planning professor who has also practiced

planning throughout his career. The book includes personal anecdotes from the author and other planners about how they launched and managed their careers, and discussion/reflection questions for the reader to consider.

We all have options - sometimes it's the vast sea of options we have that can debilitate us from deciding a direction to go. Fear not, we're going to "weigh" these options on the scale of life. You may be reading this description deciding if this book is right for you. I am proof that this guide works, and the time taken to follow this steppingstone is worth every second. It is not my intention to put you inside my strange head, but to help you use my research and planning skills in your own mind to find your own North Star. So, who am I? Some "young buck" from New York trying to give everybody advice? Negative ghost rider. I have done well, but I'm not the type of person to flaunt it or enjoy talking about it. I am grateful for what I have and may be the happiest person alive. One of my goals is to help others rise to their potential -by helping them find what direction that potential may be best pointed. I simply want to show you how I bought my first investment house and \$20,000 motor home at 22 and finished my bachelor's at 23 while Active Duty in the Marine Corps. How I became my franchises' "youngest franchisee ever" at 24, bought my second house, first commercial property, started two more businessesand so much more through the years. Now, do I promise you will make your first \$1,000,000 before 30 and it will be easy? Nope. Not every career is for everyone, hence this guide. If money is your direct objective, strap in; while this guide is not for becoming rich,

it may help you find the career you deserve to get you there. This guide will require you to develop a vow to yourself and to spend real, true, American blood, sweat and tears to complete it. Remember, I spent 6 years on and off writing this guide. Determination is going to be needed. Let's use a clear-cut, kiln dried, hog tied method to get you where you want to be, and then create a plan to make it so. Take this journey step by step, chapter by chapter and remove interruptions and distractions when you do so. When an idea or thought pops in your head put it on my copyrighted chart included in this guide. There are many guides, but THIS ONE IS YOURS!
