## The Forge of God

In this compelling fantasy from a debut author, two young people must unite two warring cultures to banish the gods who destroyed their homeland. The Fallen Gods' War drove the remnants of a victorious army across the ocean in search of a new homeland. A thousand years later, the lifeless continent of Draegora is largely forgotten, a symbol for the regiments that remain. Demons to some. Protectors to others. The power of their god-touched blades has forged a nation, though many resent their absolute control. Riam and Nola are unknowing descendants of the old world. When it's discovered they carry enough Draegoran blood to serve in the regiments, they are dragged away from their families to begin training. If they survive, they will be expected to enforce the laws of the covenant, to fight the Esharii tribesmen who raid along the border, and to be judge, jury, and executioners for those accused of crimes. For Riam, who welcomes his escape from an abusive father, the power to protect those who cannot defend themselves is alluring. For Nola, who wishes to return home, it is a betrayal by all she holds dear. Neither is given a choice and neither may ever get the chance to serve. Lies of Descent begins an epic trilogy of fallen gods, betrayal, and magic—where dark motives often dwell within the true and just, and where the things most feared sometimes lead to salvation.

## God in the Qur'an

Do you believe it's possible to be happier than you have ever been before? Not for fleeting moments, but consistently? Bestselling author Matthew Kelly believes it is possible-and in his latest book, *The Biggest Lie*, he explains how. We all want to be happy and live life to the fullest, but the answer isn't found in the world's definition of happiness. Modern culture is constantly feeding us lies, and these lies affect you more than you know. The lies that affect you the most, however, are the ones you tell yourself. These lies steal your joy, sap your energy, and cause you to lose hope. They prevent you from discovering the kind of vibrant faith the first Christians experienced. But as Matthew Kelly shows, we've arrived at a crucial moment in history. People are disillusioned with what the world offers. The world is in desperate need of change, and no one is in a better position to effect that change than Christians. We have an incredible opportunity to dispel the lies and cut through the confusion and false promises around us. This book provides the practical tools necessary to help you regain your fervor and leave your mark on the world-and experience more happiness than you thought possible. Together we can change the course of history-with humility, generosity, kindness, and joy, one Holy Moment at a time.

### Gods of the Upper Air

Graham Hancock's multi-million bestseller *Fingerprints of the Gods* remains an astonishing, deeply controversial, wide-ranging investigation of the mysteries of our past and the evidence for Earth's lost civilization. Twenty years on, Hancock returns with a book filled with completely new, scientific and archaeological evidence, which has only recently come to light. The evidence revealed in this book shows beyond reasonable doubt that an advanced civilization that flourished during the Ice Age was destroyed in the global cataclysms between 12,800 and 11,600 years ago. Near the end of the last Ice Age 12,800 years ago, a giant comet that had entered the solar system from deep space thousands of years earlier, broke into multiple fragments. Some of these struck the Earth causing a global cataclysm on a scale unseen since the extinction of the dinosaurs. At least eight of the fragments hit the North American ice cap, while further fragments hit the northern European ice cap. The impacts, from comet fragments a mile wide approaching at more than 60,000 miles an hour, generated huge amounts of heat which instantly liquidized millions of square kilometres of ice, destabilizing the Earth's crust and causing the global Deluge that is remembered in myths all around the world. A second series of impacts, equally devastating, causing further cataclysmic flooding, occurred 11,600 years ago, the exact date that Plato gives for the destruction and submergence of Atlantis. But there were survivors - known to later cultures by names such as 'the Sages', 'the Magicians', 'the Shining Ones', and 'the Mystery Teachers of Heaven'. They travelled the world in their great ships doing all in their power to keep the spark of civilization burning. They settled at key locations - Gobekli Tepe in Turkey, Baalbek in the Lebanon, Giza in Egypt, ancient Sumer, Mexico, Peru and across the Pacific where a huge pyramid has recently been discovered in Indonesia. Everywhere they went these 'Magicians of the Gods' brought with them the memory of a time when mankind had fallen out of harmony with the universe and paid a heavy price. A memory and a warning to the future. For the comet that wrought such destruction between 12,800 and 11,600 years may not be done with us yet. Astronomers believe that a 20-mile wide 'dark' fragment of the original giant comet remains hidden within its debris stream and threatens the Earth. An astronomical message encoded at Gobekli Tepe, and in the Sphinx and the pyramids of Egypt, warns that the 'Great Return' will occur in our time.

### A Girl on the Shore

*The Lie of the Land* is a novel set against the background of the German colonial wars in Namibia in the early 1900s. The central character is an academic

in linguistics who occasionally acts as a British agent. He is a cynical, private individual who sees himself as a neutral observer but is eventually forced to take sides when he witnesses the atrocities of the Herero and Nama genocide and, above all, meets a young Nama woman who enchants him. The novel explores the shifting nature of the oppressor and the oppressed. Despite the unfolding tragic events, the story is lightened by surprising bursts of humour, and is ultimately a love story.

### The Judgment of Gehenna

Lieutenant Commander Shawn 'Calvin' Hobbs and his special forces platoon just returned from a three-month mission to the stars. The technology they brought back will help with the Earth's defense, but it won't be enough to hold off the alien menace headed their way. Although they made it back alive, they returned without any new allies or help in building the fleet necessary to ensure the Earth's survival. They've got to go back. "When the Gods Aren't Gods" is the second book in "The Theogony," a trilogy that has taken Lieutenant Commander Hobbs and his special forces platoon to the stars, where they have found out that there is much more to Earth's history than is written in the history books! What do you do when myths become reality, and nothing you have ever been taught about history turns out to be true? How do you find the truth when everything you know is a lie? What is there left to believe in, when even the gods aren't gods?

### Magicians of the Gods

Natsuru Nanao, a 6th grader who lives alone with his mother, strikes up an unlikely friendship with the reserved and driven Rio Suzumura. Natsuru plays hookey from soccer camp that summer, and instead of telling the truth to his mother, he spends all his time with Rio and her kid brother at their rickety house, where a dark secret threatens to upend their fragile happiness.

### God's Funeral: Psychology: Trading the Sacred for the Secular

Christopher Hitchens, described in the London Observer as "one of the most prolific, as well as brilliant, journalists of our time" takes on his biggest subject yet—the increasingly dangerous role of religion in the world. In the tradition of Bertrand Russell's *Why I Am Not a Christian* and Sam Harris's recent bestseller, *The End Of Faith*, Christopher Hitchens makes the ultimate case against religion. With a close and erudite reading of the major religious texts, he documents the ways in which religion is a man-made wish, a cause of dangerous sexual repression, and a distortion of our origins in the cosmos. With eloquent clarity, Hitchens frames the argument for a more secular life based on science and reason, in which hell is replaced by the Hubble Telescope's awesome view of the universe, and Moses and the burning bush give way to the beauty and symmetry of the double helix. From the Hardcover edition.

### Aeneid

The stunning sequel to instant New York Times bestseller, *Wicked Saints* "Ruthless Gods opens the door to a world of fallen gods and eldritch horrors Gruesome, grotesque, and so, so glorious." - Erin A. Craig, New York Times bestselling author of *House of Salt and Sorrows* Nadya doesn't trust her magic anymore. Serefin is fighting off a voice in his head that doesn't belong to him. Malachiasz is at war with who--and what--he'lls become. As their group is continually torn apart, the girl, the prince, and the monster find their fates irrevocably intertwined. Their paths are being orchestrated by someoneor something. The voices that Serefin hears in the darkness, the ones that Nadya believes are her gods, the ones that Malachiasz is desperate to meet--those voices want a stake in the world, and they refuse to stay quiet any longer. In their dramatic follow-up to *Wicked Saints*, the first book in their *Something Dark and Holy* trilogy, Emily A. Duncan paints a Gothic, icy world where shadows whisper, and no one is who they seem, with a shocking ending that will leave you breathless. "Ruthless Gods will leave fans demanding the final installment in the trilogy." - Christine Lynn Herman, author of *The Devouring Gray* This edition uses deckle edges; the uneven paper edge is intentional.

### The Lies of Locke Lamora

Willa Knight: Dweller. Slave. Non-magical being. In Minatsol, being a dweller means that you are literally no better than dirt. In fact, dirt might actually be more useful than Willa. Her life will be one of servitude to the sols, the magic-blessed beings who could one day be chosen to become gods. At least her outer village is far removed from the cities of the sols, and she won't ever be forced to present herself to them Until one small mistake changes everything, and Willa is awarded a position to serve at Blesswood, the top sol academy in the world-a position that she definitely did not earn. Under the sudden, watchful eye of the gods, she will be tasked to serve the Abcurse brothers, five sols built of arrogance, perfection and power. They are almost gods themselves, and under their service she is either going to end up sentenced to death, or else they are going to ruin her so badly that she will wish for it. Either way, she is in trouble. This is a full novel, 90,000 words. Book 1 of 5 in the *Curse of the Gods Series*

### The Death of the Gods

The beloved debut novel about an affluent Indian family forever changed by one fateful day in 1969, from the author of *The Ministry of Utmost Happiness* **NEW YORK TIMES BESTSELLER** **MAN BOOKER PRIZE WINNER** Compared favorably to the works of Faulkner and Dickens, Arundhati Roy's modern classic is equal parts powerful family saga, forbidden love story, and piercing political drama. The seven-year-old twins Estha and Rahel see their world shaken irrevocably by the arrival of their beautiful young cousin, Sophie. It is an event that will lead to an illicit liaison and tragedies accidental and intentional, exposing "big things [that] lurk unsaid" in a country drifting dangerously toward unrest. Lush, lyrical, and unnerving, *The God of Small Things* is an award-winning landmark that started for its author an esteemed career of fiction and political commentary that continues unabated.

### The Gods Lie

The Judgment of Gehenna ('Hell') was the worst oppression that the people of Jerusalem has ever endured, and ever will. Both John the Baptist and Jesus warned the religious leaders in Israel against the coming wrath of God. As fruitless trees, Israel would have been cut from the kingdom of God and be burned in the unquenchable fire of his wrath. During the Roman siege of Jerusalem in 66-70, God took out his revenge on first-century Israel for the blood of all his holy prophets and apostles. Numerous figurative images were used by John and Jesus to describe this judgment: the unquenchable fire, fiery furnace, chaff, weeds, burn, outer darkness, and more. Unfortunately throughout history the church has interpreted these images in a literal sense and the hell-doctrine was built from it. In 'The Judgment of Gehenna' the hell-scriptures are looked at in the context that they actually describe a nation that not only murdered God's servants but also had his Son crucified. Yet, 40 years later worms devoured the flesh of the fallen while Jerusalem and the temple was burned to the ground. With that, the wrath of God was fulfilled.

### The God of Small Things

The God Delusion caused a sensation when it was published in 2006. Within weeks it became the most hotly debated topic, with Dawkins himself branded as either saint or sinner for presenting his hard-hitting, impassioned rebuttal of religion of all types. His argument could hardly be more topical. While Europe is becoming increasingly secularized, the rise of religious fundamentalism, whether in the Middle East or Middle America, is dramatically and dangerously dividing opinion around the world. In America, and elsewhere, a vigorous dispute between 'intelligent design' and Darwinism is seriously

undermining and restricting the teaching of science. In many countries religious dogma from medieval times still serves to abuse basic human rights such as women's and gay rights. And all from a belief in a God whose existence lacks evidence of any kind. Dawkins attacks God in all his forms. He eviscerates the major arguments for religion and demonstrates the supreme improbability of a supreme being. He shows how religion fuels war, foments bigotry and abuses children. The God Delusion is a brilliantly argued, fascinating polemic that will be required reading for anyone interested in this most emotional and important subject.

### The God Focused Life

All over the world there are fantastic ruins and objects that cannot be explained by conventional history, archaeology or religion. In the ground-breaking Chariots of the Gods, Erich von Daniken provides answers to these questions why do religious texts often refer to Gods who descend from fiery chariots? Why do modern space launch sites look like constructions on the plains of Nazca in Peru? Was God an astronaut? By looking at human history and the ruins of ancient civilisations with an open mind, Erich von Daniken offers a new solution to these eternal mysteries in Chariots of the Gods. Why, for instance, do the world's sacred books describe Gods who came down from the sky in fiery chariots and always promised to return? How could an ancient Sanskrit text contain an account which could only be of a journey in an alien craft? Compare photographs of American space centre launch sites to the constructions on the plains of Nazca in Peru. In order to understand the mysteries which Erich von Daniken has catalogued we must go back to these ancient relics with an open mind. We must call in the resources and experience of sciences other than archaeology. Chariots of the Gods is a provocative attempt to explain some of the universe's most interesting mysteries. Erich von Daniken has spent a lifetime gathering evidence to prove that, before the dawn of recorded history, our ancestors were visited by an alien race. Erich von Daniken was responsible for popularising the ancient astronaut hypothesis of human development. Orthodox historians have been sceptical but a vast public have been drawn to his ideas by instinctive interest and wonder. His 26 books have sold over 60 million copies in over 40 languages.

Is Man the product of a God or is "God" the product of human evolution? From the dawn of our species, every human culture-no matter how isolated-has believed in some form of a spiritual realm. According to author Matthew Alper, this is no mere coincidence but rather due to the fact that humans, as a species, are genetically predisposed to believe in the universal concepts of a god, a soul and an afterlife. This instinct to believe is the result of an evolutionary adaptation-a coping mechanism-that emerged in our species to help us survive our unique and otherwise debilitating awareness of death. Spiritual seekers and atheists alike will be compelled and transformed by Matthew Alper's classic study of science and religion. The 'God' Part of the Brain has gained critical acclaim from some of the world's leading scientists, secular humanists, and theologians, and is as a must read for anyone who has pondered the question of God's existence, as well as the meaning of our own. Praise for The "God" Part of the Brain "This cult classic in many ways

parallels Rene Descartes' search for reliable and certain knowledge Drawing on such disciplines as philosophy, psychology, and biology, Alper argues that belief in a spiritual realm is an evolutionary coping method that developed to help humankind deal with the fear of death Highly recommended." Library Journal "I very much enjoyed the account of your spiritual journey and believe it would make excellent reading for every college student - the resultant residence-hall debates would be the best part of their education. It often occurs to me that if, against all odds, there is a judgmental God and heaven, it will come to pass that when the pearly gates open, those who had the valor to think for themselves will be escorted to the head of the line, garlanded, and given their own personal audience." Edward O. Wilson, two-time Pulitzer Prize-Winner "This is an essential book for those in search of a scientific understanding of man's spiritual nature. Matthew Alper navigates the reader through a labyrinth of intriguing questions and then offers undoubtedly clear answers that lead to a better understanding of our objective reality." Elena Rusyn, MD, PhD; Gray Laboratory; Harvard Medical School "What a wonderful book you have written. It was not only brilliant and provocative but also revolutionary in its approach to spirituality as an inherited trait." Arnold Sadwin, MD, former chief of Neuropsychiatry at the University of Pennsylvania "A lively manifesto For the discipline's specific application to the matter at hand, I've seen nothing that matches the fury of The 'God' Part of the Brain, which perhaps explains why it's earned something of a cult following." Salon.com "All 6 billion plus inhabitants of Earth should be in possession of this book. Alper's tome should be placed in the sacred writings' section of libraries, bookstores, and dwellings throughout the world. Matthew Alper is the new Galileo Immensely important Defines in a clear and concise manner what each of us already knew but were afraid to admit and exclaim." John Scoggins, PhD "Vibrant vivacious. An entertaining and provocative introduction to speculations concerning the neural basis of spirituality." Free Inquiry Magazine

### Chariots of the Gods?

Founder of modern-day Lutheranism, Martin Luther (1483-1546) confronted many opponents, most notably, the Jews. Their religion directly denied Jesus as Messiah, and their arrogance, lies, usury, and hatred of humanity meant that they posed a mortal threat to society. Hence, said Luther, the harshest of measures are warranted. A shocking book.

### The Golden Sheep 1

Exploring the theme of the 'two truths', those of Christianity and the Paganism, and developing Merezhkovsky's own religious theory of the Third Testament, it became the first in "The Christ and Antichrist" trilogy. The novel made Merezhkovsky a well-known author both in Russia and Western Europe although the initial response to it at home was lukewarm. The novel tells the story of Roman Emperor Julian who during his reign (331-363) was trying to restore the cult of Olympian gods in Rome, resisting the upcoming Christianity. Christianity "in its highest manifestations is presented in the novel as a cult of an absolute virtue, unattainable on Earth which is in denial of all things Earthly," according to scholar Z.G.Mints. Ascetic to the point of being inhuman, early Christians reject reality as such. As the mother of a Christian youth Juventine curses "those servants of the Crucified" who "tear children off their mothers," hate life itself and destroy "things that are great and saintly," the elder Didim replies: a worthy follower of Christ is to learn to "hate their mother and father, wife, children, brothers and sisters, and their very own life too.

### Ruthless Gods

This doomsday masterpiece from the author of Eon and Hull Zero Three was a finalist for the Hugo and Nebula awards. On July 26, Arthur Gordon learns that Europa, the sixth moon of Jupiter, has disappeared. Not hiding, not turned black, but gone. On September 28th, Edward Shaw finds an error in the geological records of Death Valley. A cinder cone was left off the map. Could it be new? Or, stranger yet, could it be artificial? The answer may be lying beside it—a dying Guest who brings devastating news for Edward and for Planet Earth. As more unexplained phenomena spring up around the globe—a granite mountain appearing in Australia, sounds emanating from the earth's core, flashes of light among the asteroids—it becomes clear to some that the end is approaching, and there is nothing we can do. In *The Forge of God*, award-winning author Greg Bear describes the final days of the world on both a massive, scientific scale and in the everyday, emotional context of individual human lives. Facing the destruction of all they know, some people turn to God, others to their families, and a few turn to saviors promising escape from a planet being torn apart. Will they make it in time? And who gets left behind to experience the last moments of beauty and chaos on earth? Nominated for the Nebula, Hugo, and Locus Awards, *The Forge of God* is an engrossing read, breathtaking in its scope and in its detail.

It's a tough time to be a scientist: universities are shuttering science departments, federal funding agencies are facing flat budgets, and many newspapers have dropped their science sections altogether. But according to Marc Kuchner, this antiscience climate doesn't have to equal a career death knell-it just means scientists have to be savvier about promoting their work and themselves. In *Marketing for Scientists*, he provides clear, detailed advice about how to land a good job, win funding, and shape the public debate. As an astrophysicist at NASA, Kuchner knows that "marketing" can seem like a superficial distraction, whether your daily work is searching for new planets or seeking a cure for cancer. In fact, he argues, it's a critical component of the modern scientific endeavor, not only advancing personal careers but also society's knowledge. Kuchner approaches marketing as a science in itself. He translates theories about human interaction and sense of self into methods for building relationships-one of the most critical skills in any profession. And he explains how to brand yourself effectively-how to get articles published, give compelling presentations, use social media like Facebook and Twitter, and impress potential employers and funders. Like any good scientist, Kuchner bases his conclusions on years of study and experimentation. In *Marketing for Scientists*, he distills the strategies needed to keep pace in a Web 2.0 world.

### The Perfect Lie

2020 Anisfield-Wolf Book Award Winner Finalist for the National Book Critics Circle Award From an award-winning historian comes a dazzling history of the birth of cultural anthropology and the adventurous scientists who pioneered it--a sweeping chronicle of discovery and the fascinating origin story of our multicultural world. A century ago, everyone knew that people were fated by their race, sex, and nationality to be more or less intelligent, nurturing, or warlike. But Columbia University professor Franz Boas looked at the data and decided everyone was wrong. Racial categories, he insisted, were biological fictions. Cultures did not come in neat packages labeled "primitive" or "advanced." What counted as a family, a good meal, or even common sense was a product of history and circumstance, not of nature. In *Gods of the Upper Air*, a masterful narrative history of radical ideas and passionate lives, Charles King shows how these intuitions led to a fundamental reimagining of human diversity. Boas's students were some of the century's most colorful figures and unsung visionaries: Margaret Mead, the outspoken field researcher whose *Coming of Age in Samoa* is among the most widely read works of social science of all time; Ruth Benedict, the great love of Mead's life, whose research shaped post-Second World War Japan; Ella Deloria, the Dakota Sioux activist who preserved the traditions of Native Americans on the Great Plains; and Zora Neale Hurston, whose studies under Boas fed directly into her now classic novel, *Their Eyes Were Watching God*. Together, they mapped civilizations from the American South to the South Pacific and from Caribbean islands to Manhattan's city streets, and unearthed an essential fact buried by centuries of prejudice: that humanity is an undivided whole. Their revolutionary findings would go on to inspire the fluid conceptions of identity we know today. Rich in drama, conflict, friendship, and love, *Gods of the Upper Air* is a brilliant and groundbreaking history of American progress and the opening of the modern mind.

### Goodnight Punpun

Who is Allah? What does He ask of those who submit to His teachings? Pulitzer Prize-winner Jacke Miles gives us a deeply probing, revelatory portrait of the world's second largest, fastest-growing and perhaps most tragically misunderstood religion. In doing so, Miles illuminates what is unique about Allah, His teachings, and His resolutely merciful temperament, and he thereby reveals that which is false, distorted, or simply absent from the popular conception of the heart of Islam. So, too, does Miles uncover the spiritual and scriptural continuity of the Islamic tradition with those of Judaism and Christianity, and the deep affinities among the three by setting passages from the Hebrew Bible, the New Testament, and the Qur'an side by side. In the spirit of his two previous books, *God and Christ*, and with his characteristic sensitivity, perspicacity and prodigious command of the subject, Miles calls for us all to read another's scriptures with the same understanding and accommodating eye that we turn upon our own.

### When the Gods Aren't Gods

Earth is long since dead. On a colony planet, a band of men has gained control of technology, made themselves immortal, and now rules their world as the

gods of the Hindu pantheon. Only one dares oppose them: he who was once Siddhartha and is now Mahasamatman. Binder of Demons. Lord of Light.

### The God I Never Knew

A journey to some of the Earth's most endangered people in the remote Upper Amazon. . . . a look at the rituals of the Bwiti cults of Gabon and Zaire. . . . a field watch on the eating habits of 'stoned' apes and chimpanzees - these adventures are all a part of ethnobotanist Terence McKenna's extraordinary quest to discover the fruit of the Tree of Knowledge. He wonders why, as a species, we are so fascinated by altered states of consciousness. Can they reveal something about our origins as human beings and our place in nature? As an odyssey of mind, body and spirit, Food of the Gods is one of the most fascinating and surprising histories of consciousness ever written. And as a daring work of scholarship and exploration, it offers an inspiring vision for individual fulfilment and a humane basis for our interaction with each other and with the natural world. 'Brilliant, provocative, opinionated, poetic and inspiring. . . . Essential reading for anyone who ever wondered why people take drugs.' Rupert Sheldrake

### The God Delusion. 10th Anniversary Edition

They say that the Thorn of Camorr can beat anyone in a fight. They say he steals from the rich and gives to the poor. They say he's part man, part myth, and mostly street-corner rumor. And they are wrong on every count. Only averagely tall, slender, and god-awful with a sword, Locke Lamora is the fabled Thorn, and the greatest weapons at his disposal are his wit and cunning. He steals from the rich - they're the only ones worth stealing from - but the poor can go steal for themselves. What Locke cons, wheedles and tricks into his possession is strictly for him and his band of fellow con-artists and thieves: the Gentleman Bastards. Together their domain is the city of Camorr. Built of Elderglass by a race no-one remembers, it's a city of shifting revels, filthy canals, baroque palaces and crowded cemeteries. Home to Dons, merchants, soldiers, beggars, cripples, and feral children. And to Capa Barsavi, the criminal mastermind who runs the city. But there are whispers of a challenge to the Capa's power. A challenge from a man no one has ever seen, a man no blade can touch. The Grey King is coming. A man would be well advised not to be caught between Capa Barsavi and The Grey King. Even such a master of the sword as the Thorn of Camorr. As for Locke Lamora
