The Smithsonian Book of North American Mammals

Who was the first person to dine in space? How long was the Wright brothers's first successful flight? What famous aircraft was named after a grape-flavored soft drink? What toy based on an animated film accompanied astronauts on a shuttle mission in 2000? These questions and many more are answered in The Smithsonian Book of Air & Space Trivia. In addition to the canon of space and aviation information, the pages are illustrated with more than 125 objects from the Smithsonian National Air and Space Museum's collections.

The Smithsonian Book of Air & Space Trivia

Smithsonian Civil War is a lavishly illustrated coffee-table book featuring 150 entries in honor of the 150th anniversary of the Civil War. From among tens of thousands of Civil War objects in the Smithsonian's collections, curators handpicked 550 items and wrote a unique narrative that begins before the war through the Reconstruction period. The perfect gift book for fathers and history lovers, Smithsonian Civil War combines one-of-a-kind, famous, and previously unseen relics from the war in a truly unique narrative. Smithsonian Civil War takes the reader inside the great collection of Americana housed at twelve national museums and archives and brings historical gems to light. From the National Portrait Gallery come rare early photographs of Stonewall Jackson and Ulysses S. Grant; from the National Museum of American History, secret messages that remained hidden inside Lincoln's gold watch for nearly 150 years; from the National Air and Space Museum, futuristic Civil War-era aircraft designs. Thousands of items were evaluated before those of greatest value and significance were selected for inclusion here. Artfully arranged in 150 entries, they offer a unique, panoramic view of the Civil War.

The Smithsonian Collection of Newspaper Comics

Selected comic treasures from American newspaper pages from 1896 to the 1970s display a range of graphic experimentation and imaginative storytelling

SMITHSONIAN BK BKS

Sweet Home Café Cookbook

Presents descriptions and illustrations of hundreds of North American mammals, along with their scientific and common names and information on behavior, diet, reproduction, growth, longevity, and habitat.

The Jefferson Bible

On June 12, 1972, a powerful explosion rocked American Airlines Flight 96 a mere five minutes after its takeoff from Detroit. The explosion ripped a gaping hole in the bottom of the aircraft and jammed the hydraulic controls. Miraculously, despite the damage and ensuing chaos, the pilots were able to land the plane safely. Less than two years later, on March 3, 1974, a sudden, forceful blowout tore through Turk Hava Yollari (THY) Flight 981 from Paris to London. THY Flight 981 was not as lucky as Flight 96; it crashed in a forest in France, and none of the 346 people onboard survived. What caused the mysterious explosions? How were they linked? Could they have been prevented? The Flight 981 Disaster addresses these questions and many more, offering a fascinating insiders' look at two dramatic aviation disasters.

Werner's Nomenclature of Colours

In the bestselling tradition of Hampton Sides's *In the Kingdom of Ice*, a riveting and cinematic tale of Dutch polar explorer William Barents and his three harrowing Arctic expeditions—the last of which resulted in a relentlessly challenging year-long fight for survival. The human story has always been one of perseverance—often against remarkable odds. The most astonishing survival tale of all might be that of 16th-century Dutch explorer William Barents and his crew of sixteen, who ventured farther north than any Europeans before and, on their third polar exploration, lost their ship off the frozen coast of Nova Zembla to unforgiving ice. The men would spend the next year fighting off ravenous polar bears, gnawing hunger, and endless winter. In *Icebound*, Andrea Pitzer masterfully combines a gripping tale of survival with a sweeping history of the great Age of Exploration—a time of hope, adventure, and seemingly unlimited geographic frontiers. At the story's center is William Barents, one of the 16th century's greatest navigators whose larger-than-life ambitions and obsessive quest to chart a path through the deepest, most remote regions of the Arctic ended in both tragedy and glory. Journalist Pitzer did extensive research, learning how to use four-hundred-year-old navigation equipment, setting out on three Arctic expeditions to retrace Barents's steps, and visiting replicas of Barents's ship and cabin. "A visceral, thrilling account full of tantalizing surprises" (Andrea Barrett, author of *The Voyage of the Narwhal*),

Pitzer's reenactment of Barents's ill-fated journey shows us how the human body can function at twenty degrees below, the history of mutiny, the art of celestial navigation, and the intricacies of building shelters. But above all, it gives us a first-hand glimpse into the true nature of human courage.

Official Guide to the Smithsonian National Museum of African American History and Culture

Almost from the day of its accidental discovery along the banks of the Columbia River in Washington State in July 1996, the ancient skeleton of Kennewick Man has garnered significant attention from scientific and Native American communities as well as public media outlets. This volume represents a collaboration among physical and forensic anthropologists, archaeologists, geologists, and geochemists, among others, and presents the results of the scientific study of this remarkable find. Scholars address a range of topics, from basic aspects of osteological analysis to advanced research focused on Kennewick Man's origins and his relationships to other populations. Interdisciplinary studies, comprehensive data collection and preservation, and applications of technology are all critical to telling Kennewick Man's story. Kennewick Man: The Scientific Investigation of an Ancient American Skeleton is written for a discerning professional audience, yet the absorbing story of the remains, their discovery, their curation history, and the extensive amount of detail that skilled scientists have been able to glean from them will appeal to interested and informed general readers. These bones lay silent for nearly nine thousand years, but now, with the aid of dedicated researchers, they can speak about the life of one of the earliest human occupants of North America.

A Fool's Errand

"Founding Director Lonnie Bunch's inside story of how the Smithsonian National Museum of African American History and Culture was created. By turns inspiring, funny, frustrating, quixotic, and bittersweet, this is his deeply personal tale of the challenges and rewards of bringing a nationally acclaimed new institution to life"--

Exoplanets

Introduces the Smithsonian, the world's largest museum complex, providing floor plans for the various branches, information on hours, public transportation, tours, special attractions for children, and highlights from some of its major exhibits.

The Smithsonian Book of Invention

"An exploration of the scientific career of James Smithson, who left his fortune to establish the Smithsonian Institution"--

Last Days of the Concorde

A fun, pocket-sized book presenting the remarkable dinosaurs and other creatures that roamed Earth billions of years ago Smithsonian Dinosaurs and Other Amazing Creatures from Deep Time traces the journey of life on Earth from its origins some 4.6 billion years ago. Beginning with the first evidence of life in the form of single-celled microbes, it moves through the Cambrian era's explosion of biodiversity around 540 million years ago through the mass extinction event 252 million years ago that cleared the stage for the first turtles, pterosaurs, and other dinosaurs and mammals of the Triassic era. It offers a rare look at some of the world's most fascinating creatures: from sauropods, the largest creatures to ever walk the land, to the top carnivorous predator Tyrannosaurus rex, as well as the mastodons, saber-toothed cats, dire wolves, walrus-whales, and other beasts that seem outlandish to us now. Profiling these and many other fascinating creatures throughout prehistory, the book is sure to delight young dinosaur enthusiasts.

The Wrong Wrights

In The Simple Faith of Franklin Delano Roosevelt, religion journalist and author Christine Wicker establishes that faith was at the heart of everything Roosevelt wanted for the American people. This powerful book is the first in-depth look at how one of America's richest, most patrician presidents became a passionate and beloved champion of the downtrodden--and took the country with him. Those who knew Roosevelt best invariably credited his spiritual faith as the source of his passion for democracy, justice, and equality. Like many Americans of that time, his beliefs were simple. He believed the God who heard his prayers and answered them expected him to serve others. He anchored his faith in biblical stories and teachings. During times so hard that the country would have followed him anywhere, he summoned the better angels of the American character in ways that have never been surpassed.

Fire of Life

Chronicles inventive artifacts and systems as related to technology, science and industry and analyzes the inventive spirit and process and its impact upon human civilization with future projections

America's Marine Sanctuaries

"Four middle-schoolers visiting the Smithsonian discover that someone is tampering with history. They use their history and science smarts to foil the bad guys trying to rewrite history! With the help of a mysterious museum 'fabrications specialist' named AI, they travel through time to try and restore the Wright Brothers to their well-earned place in history"--Page 4 of cover.

Icebound

Argues that the Solutrean culture of coastal Spain and the European Atlantic Shelf was the ancestral industry to the North American Clovis

industry.

The Simple Faith of Franklin Delano Roosevelt

Looks at the development of modern technology in the areas of print, telegraph, telephone, telecommunications, recorded sound, movies, radio, television, computers, and software

National Museum of African American History and Culture

Book of Flight

Summary: The major milestones in flight history illustrated from the collections of the National Air and Space Museum. Includes the development of flight and diagrams explaining flight science and technology.

The Science of James Smithson

In December 2015, the Smithsonian called on rock and roll lovers around the world to collect photos and stories of their favorite moments in music. Fans dug through attics, basements, closets, shoeboxes, digital cameras, and photo albums to post great rock shots to rockandroll.si.edu. From Woodstock to the Whisky a Go Go, from Lollapalooza to the 9-30 Club, and all the rockin' places in between, fans overwhelmingly responded with their favorite rock and roll moments. Iconic artists ranging from the Who to Nirvana to Chuck Berry to the Jimi Hendrix and many more are celebrated here. There are early photographs of everyone from Run-D.M.C. to the Runaways, and contemporary shots of some of the biggest names in music, including Bruce Springsteen, the Rolling Stones, and Metallica. Presented together, these photographs create a kaleidoscopic history of the artists, the musical styles, the venues, the concerts, and the fans. This is rock and roll as it has never been seen before.

Kennewick Man

From a New York Times-bestselling historian comes the story of how the alphabet ordered our world. A Place for Everything is the first-ever history of alphabetization, from the Library of Alexandria to Wikipedia. The story of alphabetical order has been shaped by some of history's most compelling characters, such as industrious and enthusiastic early adopter Samuel Pepys and dedicated alphabet champion Denis Diderot. But though even George Washington was a proponent, many others stuck to older forms of classification -- Yale listed its students by their family's social status until 1886. And yet, while the order of the alphabet now rules -- libraries, phone books, reference books, even the

order of entry for the teams at the Olympic Games -- it has remained curiously invisible. With abundant inquisitiveness and wry humor, historian Judith Flanders traces the triumph of alphabetical order and offers a compendium of Western knowledge, from A to Z.

Official Guide to the Smithsonian, Third Ed

By Fall 1963, the Civil Rights Movement is an undeniable keystone of the national conversation, and as chair of the Student Nonviolent Coordinating Committee, John Lewis is right in the thick of it. With the stakes continuing to rise, white supremacists intensify their opposition through government obstruction and civilian terrorist attacks, a supportive president is assassinated, and African-Americans across the South are still blatantly prohibited from voting. To carry out their nonviolent revolution, Lewis and an army of young activists launch a series of innovative projects, including the Freedom Vote, Mississippi Freedom Summer, and a pitched battle for the soul of the Democratic Party waged live on national television. But strategic disputes are deepening within the movement, even as 25-year-old John Lewis heads to Alabama to risk everything in a historic showdown that will shock the world.

NA INDIANS

Who was the first person to dine in space? How long was the Wright brothers's first successful flight? What famous aircraft was named after a grape-flavored soft drink? What toy based on an animated film accompanied astronauts on a shuttle mission in 2000? These questions and many more are answered in The Smithsonian Book of Air & Space Trivia. In addition to the canon of space and aviation information, the pages are illustrated with more than 125 objects from the Smithsonian National Air and Space Museum's collections.

The Flight 981 Disaster

Accompanied by more than 300 illustrations, most in full color, The Smithsonian Book of Books presents the history, the art, and the influence of books through all ages and cultures. Beginning with the ancient origins of writing, Olmert revisits great works of religion, science, and literature. 338 illustrations, 311 in color.

Smithsonian Rock and Roll

An ABC book celebrating and inspiring diversity A Is for All the Things You Are: A Joyful ABC Book is an alphabet board book developed by the National Museum of African American History and Culture that celebrates what makes us unique as individuals and connects us as humans. This lively and colorful book introduces young readers, from infants to age seven, to twenty-six key traits they can explore and cultivate as they grow. Each letter offers a description of the trait, a question inviting the reader to examine how he or she experiences it in daily life, and lively illustrations. The book supports understanding and development of each child's healthy racial identity, the joy of human

diversity and inclusion, a sense of justice, and children's capacity to act for their own and others' fair treatment.

OFCL GT NMNH 2004 PB

Across Atlantic Ice

"A colorful guide introducing the newest Smithsonian museum, the National Museum of African American History and Culture"--

The Smithsonian Book of Presidential Trivia

Recreates the cultures of the ancestors of today's Indian peoples--their religions, customs, tools, weapons, arts, architecture and scientific knowledge--on the basis of evidence from archaeological sites both large and small, bringing to life the North America of edges previously relegated to a kind of historical limbo.

A Is for All the Things You Are

Presents selections from comic books from 1938 to 1955 that feature the adventures of characters such as Superman, Batman, Pogo, Captain Marvel, and Donald Duck

1934

The gripping true tale of a devastating plane crash, the investigation into its causes, and the race to prevent similar disasters in the future. On July 25, 2000, a Concorde, the world's fastest passenger plane, was taking off from Charles de Gaulle Airport in Paris when it suddenly burst into flames. An airliner capable of flying at more than twice the speed of sound, the Concorde had completed 25 years of successful flights, whisking wealthy passengers--from diplomats to rock stars to corporate titans--between continents on brief and glamorous flights. Yet on this fateful day, the chartered Concorde jet, en route to America, crashed and killed all 109 passengers and crew onboard and four people on the ground. Urgent questions immediately arose as investigators scrambled to discover what had gone wrong. What caused the fire? Could it have been prevented? And, most urgently, was the Concorde safe to fly? Last Days of the Concorde addresses these issues and many more, offering a fascinating insider's look at the dramatic disaster, the hunt for clues, and the systemic overhauls that followed the crash.

March: Book Three

New English Canaan of Thomas Morton

Feature fifty-six paintings from the Smithsonian's collection created for the Public Works of Art program during the Great Depression.

A Place for Everything

The Jefferson Bible, or The Life and Morals of Jesus of Nazareth as it is formally titled, was a book constructed by Thomas Jefferson in the latter years of his life by cutting and pasting numerous sections from various Bibles as extractions of the doctrine of Jesus. Jefferson's composition excluded sections of the New Testament containing supernatural aspects as well as perceived misinterpretations he believed had been added by the Four Evangelists. In 1895, the Smithsonian Institution under the leadership of librarian Cyrus Adler purchased the original Jefferson Bible from Jefferson's great-granddaughter Carolina Randolph for \$400. A conservation effort commencing in 2009, in partnership with the museum's Political History department, allowed for a public unveiling in an exhibit open from November 11, 2011, through May 28, 2012, at the National Museum of American History.

The Smithsonian Book of Air & Space Trivia

Shares engaging, lesser-known facts about U.S. Presidents accompanied by photos of artifacts from the Smithsonian's collections, organizing entries under such chapter headings as "First Families," "Assassination" and "Impeachment, Controversy, Shame." Original.

InfoCulture

The past few years have seen an incredible explosion in our knowledge of the universe. Since its 2009 launch, the Kepler satellite has discovered more than two thousand exoplanets, or planets outside our solar system. More exoplanets are being discovered all the time, and even more remarkable than the sheer number of exoplanets is their variety. In Exoplanets, astronomer Michael Summers and physicist James Trefil explore these remarkable recent discoveries: planets revolving around pulsars, planets made of diamond, planets that are mostly water, and numerous rogue planets wandering through the emptiness of space. This captivating book reveals the latest discoveries and argues that the incredible richness and complexity we are finding necessitates a change in our questions and mental paradigms. In short, we have to change how we think about the universe and our place in it, because it is stranger and more interesting than we could have imagined.

Envisioning Exoplanets

A celebration of African American cooking with 109 recipes from the National Museum of African American History and Culture's Sweet

Home Café Since the 2016 opening of the National Museum of African American History and Culture, its Sweet Home Café has become a destination in its own right. Showcasing African American contributions to American cuisine, the café offers favorite dishes made with locally sourced ingredients, adding modern flavors and contemporary twists on classics. Now both readers and home cooks can partake of the café's bounty: drawing upon traditions of family and fellowship strengthened by shared meals, Sweet Home Café Cookbook celebrates African American cooking through recipes served by the café itself and dishes inspired by foods from African American culture. With 109 recipes, the sumptuous Sweet Home Café Cookbook takes readers on a deliciously unique journey. Presented here are the salads, sides, soups, snacks, sauces, main dishes, breads, and sweets that emerged in America as African, Caribbean, and European influences blended together. Featured recipes include Pea Tendril Salad, Fried Green Tomatoes, Hoppin' John, Sénégalaise Peanut Soup, Maryland Crab Cakes, Jamaican Grilled Jerk Chicken, Shrimp & Grits, Fried Chicken and Waffles, Pan Roasted Rainbow Trout, Hickory Smoked Pork Shoulder, Chow Chow, Banana Pudding, Chocolate Chess Pie, and many others. More than a collection of inviting recipes, this book illustrates the pivotal--and often overlooked--role that African Americans have played in creating and re-creating American foodways. Offering a deliciously new perspective on African American food and culinary culture, Sweet Home Café Cookbook is an absolute must-have.

Smithsonian Civil War

An extraordinary illustrated overview of the National Marine Sanctuary System and a guide to its fourteen protected underwater locations America's Marine Sanctuaries tells the story of fourteen underwater places so important they are under special protection, together forming the US National Marine Sanctuary System. These sanctuaries, spanning more than 620,000 square miles and ranging from the Florida Keys to the Great Lakes and to the Hawaiian Islands, are critical and breathtaking marine habitats that provide homes to endangered and threatened species. They also preserve America's rich maritime heritage and act as living laboratories for science, research, education, and conservation, offering outdoor recreation experiences for all ages. Through 175 full-color photographs and lively narrative, America's Marine Sanctuaries showcases each of the marine sanctuaries and the creatures that live there, from whales and manatees to Hawaiian monk seals and Laysan ducks, as well as sunken ships from the Ghost Fleet and USS Monitor to Shipwreck Alley. The book underscores how marine sanctuaries have shaped the nation's development, survival, and identity, and celebrates these protected underwater treasures for all they can tell us about our communities, our country, and our world.

A Smithsonian Book of Comic-book Comics

Shares some of the treasures of the National Museum of African American History and Culture's collections, including a hymn book owned by Harriet Tubman, an open-cockpit Tuskegee Airmen trainer plane; and Muhammad Ali's headgear.

Smithsonian Dinosaurs and Other Amazing Creatures from Deep Time

"Envisioning Exoplanets traces the journey of astronomers and researchers on their quest to explore the universe for a planet like Earth"--

The Innocents Abroad

Explores man's perception of and relation to the sun from earliest times to the present, discussing the sun's origin, solar energy, and facts and theories that implicate the sun in near-disasters and including hundreds of photographs and illustrations
