“Hope Jahren is the voice that science has been waiting for.” —Nature “A superb account of the deadly struggle between humanity and what may prove the only life-bearing planet within ten light years, written in a brilliantly sardonic and conversational style.” —E. O. Wilson “Hope Jahren asks the central question of our time: how can we learn to live on a finite planet? The Story of More is thoughtful, informative, and—above all—essential.” —Elizabeth Kolbert, author of The Sixth Extinction Hope Jahren is an award-winning scientist, a brilliant writer, a passionate teacher, and one of the seven billion people with whom we share this earth. In The Story of More, she illuminates the link between human habits and our imperiled planet. In concise, highly readable chapters, she takes us through the science behind the key inventions—from electric power to large-scale farming to automobiles—that, even as they help us, release greenhouse gases into the atmosphere like never before. She explains the current and projected consequences of global warming—from superstorms to rising sea levels—and the actions that we all can take to fight back. At once an explainer on the mechanisms of global change and a lively, personal narrative given to us in Jahren’s inimitable voice, The Story of More is the essential pocket primer on climate change that will leave an indelible impact on everyone who reads it.

### **Robby's Quest for Seed**

Winner of the National Book Critics Circle Award for Autobiography A New York Times 2016 Notable Book National Best Seller Named one of TIME magazine’s “100 Most Influential People” An Amazon Top 20 Best Book of 2016 A Washington Post Best Memoir of 2016 A TIME and Entertainment Weekly Best Book of 2016 An illuminating debut memoir of a woman in science; a moving portrait of a longtime friendship; and a stunningly fresh look at plants that will forever change how you see the natural world Acclaimed scientist Hope Jahren has built three laboratories in which she’s studied trees, flowers, seeds, and soil. Her first book is a revelatory treatise on plant life—but it is also so much more. Lab Girl is a book about work, love, and the mountains that can be moved when those two things come together. It is told through Jahren’s remarkable stories: about her childhood in rural Minnesota with an uncompromising mother and a father who encouraged hours of play in his classroom’s labs; about how she found a sanctuary in science, and learned to perform lab work done “with both the heart and the hands”; and about the inevitable disappointments, but also the triumphs and exhilarating discoveries, of scientific work. Yet at the core of this book is the story of a relationship Jahren forged with a brilliant, wounded man named Bill, who becomes her lab partner and best friend. Their sometimes rogue adventures in science take them from the Midwest across the United States and back again, over the Atlantic to the ever-light skies of the North Pole and to tropical Hawaii, where she and her lab currently make their home. Jahren’s probing look at plants, her astonishing tenacity of spirit, and her acute insights on nature enliven every page of this extraordinary book. Lab Girl opens your eyes to the beautiful, sophisticated mechanisms within every leaf, blade of grass, and flower petal. Here is an eloquent demonstration of what can happen when you find the stamina, passion, and sense of sacrifice needed to make a life out of what you truly love, as you discover along the way the person you were meant to be.

foreign policy insiders, Senor and Singer examine the lessons of the country's adversity-driven culture, which flattens hierarchy and elevates informality-- all backed up by government policies focused on innovation. In a world where economies as diverse as Ireland, Singapore and Dubai have tried to re-create the "Israel effect", there are entrepreneurial lessons well worth noting. As America reboots its own economy and can-do spirit, there's never been a better time to look at this remarkable and resilient nation for some impressive, surprising clues.

### **Forever Lost**

From the bestselling author of Lab Girl comes a slim, urgent missive on the defining issue of our time: here is Hope Jahren on climate change, our timeless pursuit of more, and how the same human ambition that got us here can also be our salvation. Hope Jahren is an award-winning geobiologist, a brilliant writer, and one of the seven billion people with whom we share this earth. The Story of More is her impassioned open letter to humanity as we stand at the crossroads of survival and extinction. Jahren celebrates the long history of our enterprising spirit--which has tamed wild crops, cured diseases, and sent us to the moon--but also shows how that spirit has created excesses that are quickly warming our planet to dangerous levels. In short, highly readable chapters, she takes us through the science behind the key inventions--from electric power to large-scale farming and automobiles--that, even as they help us, release untenable amounts of carbon dioxide into the atmosphere. She explains the current and projected consequences of greenhouse gases--from superstorms to rising sea levels--and shares the science-based tools that could help us fight back. At once an explainer on the mechanisms of warming and a capsule history of human development, The Story of More illuminates the link between our consumption habits and our endangered earth. It is the essential pocket primer on climate change that will leave an indelible impact on everyone who reads it.

### **The Magic of Oz**

As a child, Autumn Williams saw two hair-covered creatures standing in the woods behind her home in Washington State. She has spent her entire adult life seeking to understand why those non-human eyes held such an expression of human-like intelligence. What is the nature of a Sasquatch? Is it human? Animal? Or something in-between? How does Bigfoot live? How does it interact with others of its kind? And how would it interact with us? What would we learn about these creatures, if we stopped pursuing them and they no longer avoided us? One man would finally offer answers to those questions. He is more than a witness. He is the friend of a wild man and he calls him Enoch.

### **Stubble Or Wheat?**

Winner of the 2017 Rainbow Award for BEST GAY HISTORICAL! In 1845, as America is drowning in its own racial conflict, in a time when forbidden love has to remain a secret, can two young men find love when one has everything to lose, and the other has nothing? For Tobias, a young African man, life has ended before it began. Snatched abruptly from his homeland and enslaved into the Antebellum South, grand homes and majestic oak trees meant little to him. Now he is considered the property of other men, but his spirit would not be broken. The awkward Benjamin Nathanael Lee lives a privileged life. His father owns the largest tobacco plantation south of the Mason Dixon line. Ben wants little to do with the harsh realities of running a plantation-that is, until he meets Tobias, the one person that changes everything for him. Wealth, greed, and power brought them together. The same now threatens to separate them forever. The two men are on the verge of losing the one thing that matters: their love for one another. Against the odds, they steal off and embark on a journey to find freedom: the freedom to love one another and to live a life without the chains of slavery. Come to the Oaks is the tale of a forbidden romance-a love forged by two young men as they journey through a land that is tearing itself apart.

## **There Is More To The Story**

Where's Stephanie? is about a grandmother's hope to be reunited with her granddaughter, who was given up for adoption. When her granddaughter Stephanie was born, Anna Weber got to hold her before saying goodbye. Longing to see her granddaughter again, she placed clues in unlikely places, including a letter in Stephanie's Social Services file, hoping that one day, by some miracle, Stephanie would follow the clues and find her. Based on actual events, this inspirational novel follows Anna on a long journey about loss, separation, and the power of redemption. Realizing others are facing similar situations, Livingston provides readers with a list of adoption groups that can help in search for surrendered family members.

## **Come to the Oaks**

From the critically acclaimed author of Amina's Voice comes a new story inspired by Louisa May Alcott's beloved classic, Little Women, featuring four sisters from a modern American Muslim family living in Georgia. When Jameela Mirza is picked to be feature editor of her middle school newspaper, she's one step closer to being an award-winning journalist like her late grandfather. The problem is her editor-in-chief keeps shooting down her article ideas. Jameela's assigned to write about the new boy in school, who has a cool British accent but doesn't share much, and wonders how she'll make his story gripping enough to enter into a national media contest. Jameela, along with her three sisters, is devastated when their father needs to take a job overseas, away from their cozy Georgia home for six months. Missing him makes Jameela determined to write an epic article—one to make her dad extra proud. But when her younger sister gets seriously ill, Jameela's world turns upside down. And as her hunger for fame looks like it might cost her a blossoming friendship, Jameela questions what matters most, and whether she's cut out to be a journalist at all

## **Where's Stephanie?**

"At last--a global plan that actually adds up."--James Hansen, former director, NASA Goddard Institute for Space Studies The world must reach negative greenhouse gas emissions by 2050 to avoid the most catastrophic effects of climate change. Yet no single plan has addressed the full scope of the problem--until now. In The 100% Solution, Solomon Goldstein-Rose--a leading millennial climate activist and a former Massachusetts state representative--makes clear what needs to happen to hit the 2050 target: the manufacturing booms we must spur, the moonshot projects we must fund, the amount of CO2 we'll have to sequester from the atmosphere, and much more. Most importantly, he shows us the more prosperous and equitable world we can build by uniting the efforts of activists, industries, governments, scientists, and voters to get the job done. This is the guide we've been waiting for. As calls for a WWII-scale mobilization intensify--especially among youth activists--this fully illustrated, action-oriented book arms us with specific demands, sets the stakes for what our leaders must achieve, and proves that with this level of comprehensive thinking we can still take back our future.

## Forgive No More

"The next thing that happened to us was very interesting. It was as real as the half-crowns—not just pretending. I shall try to write it as like a real book as I can. Of course we have read Mr Sherlock Holmes, as well as the yellow-covered books with pictures outside that are so badly printed; and you get them for fourpence-halfpenny at the bookstall when the corners of them are beginning to curl up and get dirty, with people looking to see how the story ends when they are waiting for trains. I think this is most unfair to the boy at the bookstall. The books are written by a gentleman named Gaboriau, and Albert's uncle says they are the worst translations in the world—and written in vile English. Of course they're not like Kipling, but they're jolly good stories. And we had just been reading a book by Dick Diddlington—that's not his right name, but I know all about libel actions, so I shall not say what his name is really, because his books are rot."

### **A Good War**

“This is the roadmap out of climate crisis that Canadians have been waiting for.” — Naomi Klein, activist and New York Times bestselling author of *This Changes Everything* and *The Shock Doctrine*

- One of Canada's top policy analysts provides the first full-scale blueprint for meeting our climate change commitments
- Contains the results of a national poll on Canadians' attitudes to the climate crisis
- Shows that radical transformative climate action can be done, while producing jobs and reducing inequality as we retool how we live and work.
- Deeply researched and targeted specifically to Canada and Canadians while providing a model that other countries could follow

Canada needs to reduce its greenhouse gas emissions by 50% to prevent a catastrophic 1.5 degree increase in the earth's average temperature — assumed by many scientists to be a critical “danger line” for the planet and human life as we know it. It's 2020, and Canada is not on track to meet our targets. To do so, we'll need radical systemic change to how we live and work—and fast. How can we ever achieve this? Top policy analyst and author Seth Klein reveals we can do it now because we've done it before. During the Second World War, Canadian citizens and government remade the economy by retooling factories, transforming their workforce, and making the war effort a common cause for all Canadians to contribute to. Klein demonstrates how wartime thinking and community efforts can be repurposed today for Canada's own Green New Deal. He shares how we can create jobs and reduce inequality while tackling our climate obligations for a climate neutral—or even climate zero—future. From enlisting broad public support for new economic models, to job creation through investment in green infrastructure, Klein shows us a bold, practical policy plan for Canada's sustainable future. More than this: *A Good War* offers a remarkably hopeful message for how we can meet the defining challenge of our lives. COVID-19 has brought a previously unthinkable pace of change to the world—one which demonstrates our ability to adapt rapidly when we're at risk. Many recent changes are what Klein proposes in these very pages. The world can, actually, turn on a dime if necessary. This is the blueprint for how to do it.

### **The Story of My Life; Or**

### **More from Less**

### **The 100% Solution**

From the coauthor of the New York Times bestseller *The Second Machine Age*, a paradigm-shifting argument “full of fascinating information and provocative insights” (Publishers Weekly, starred review)—demonstrating that we are increasing prosperity while using fewer natural resources. Throughout history, the only way for humanity to grow was by degrading the Earth: chopping down forests, polluting the air and water, and endlessly using up resources. Since the first Earth Day in 1970, the focus has been on radically changing course: reducing our consumption, tightening our belts, and learning to share and reuse. Is that argument correct? Absolutely not. In *More from Less*, McAfee argues that to solve our ecological problems we should do the opposite of what a decade of conventional wisdom suggests. Rather than reduce and conserve, we should rely on the cost-consciousness built into capitalism and the streamlining miracles of technology to create a more efficient world. America—a large, high-tech country that accounts for about 25% of the global economy—is now generally using less of most resources year after year, even as its economy and population continue to grow. What’s more, the US is polluting the air and water less, emitting fewer greenhouse gases, and replenishing endangered animal populations. And, as McAfee shows, America is not alone. Other countries are also transforming themselves in fundamental ways. What has made this turnabout possible? One thing, primarily: the collaboration between technology and capitalism, although good governance and public awareness have also been critical. McAfee does warn of issues that haven’t been solved, like global warming, overfishing, and communities left behind as capitalism and tech progress race forward. But overall, *More from Less* is a revelatory and “deeply engaging” (Booklist) account of how we’ve stumbled into an unexpectedly better balance with nature—one that holds out the promise of more abundant and greener centuries ahead.

### **Unchosen**

This middle grade adaptation of acclaimed geochemist and geobiologist Hope Jahren's highly respected nonfiction work is the perfect book for kids who are interested in learning about climate change and how they can contribute to creating a more sustainable future. Hope Jahren illuminates the science behind key inventions, clarifying how electricity, large-scale farming, and automobiles have both helped and harmed our world. She explains the current and projected consequences of unchecked global warming, from superstorms to rising sea levels, resulting from the unprecedented amounts of greenhouse gases being released into our atmosphere. The links between human consumption habits and our endangered existence are very real. Still, Jahren maintains that our ever-broadening science-based knowledge can help us counter these effects. The eye opening information provided in *The Story of More* will help readers understand the path needed. If we collectively make informed choices now, Jahren

This extraordinary work of investigative journalism takes readers inside America's isolated Mormon Fundamentalist communities, where some 40,000 people still practice polygamy. Defying both civil authorities and the Mormon establishment in Salt Lake City, the renegade leaders of these Taliban-like theocracies are zealots who answer only to God. At the core of Krakauer's book are brothers Ron and Dan Lafferty, who insist they received a commandment from God to kill a blameless woman and her baby girl. Beginning with a meticulously researched account of this appalling double murder, Krakauer constructs a multi-layered, bone-chilling narrative of messianic delusion, polygamy, savage violence, and unyielding faith. Along the way he uncovers a shadowy offshoot of America's fastest growing religion, and raises provocative questions about the nature of religious belief.
