The Untold Story of the Worlds Leading Environmental Institution

The past, present, and possible future of the agency designed to act as "the world's environmental
conscience." The United Nations Environmental Programme (UNEP) was founded in 1972 as a nimble,
fast, and flexible entity at the core of the UN system--a subsidiary body rather than a specialized agency.
It was intended to be the world's environmental conscience, an anchor institution that established norms
and researched policy, leaving it to other organizations to carry out its recommendations. In this book,
Maria Ivanova offers a detailed account of UNEP's origin and history. Ivanova counters the common
criticism that UNEP was deficient by design, arguing that UNEP has in fact delivered on much (though
not all) of its mandate.

The World According to Garp

Soon to be a Major Motion Picture National Book Award Finalist—Fiction In the aftermath of the Civil War, an aging itinerant news reader agrees to transport a young captive of the Kiowa back to her people in this exquisitely rendered, morally complex, multilayered novel of historical fiction from the author of *Enemy Women* that explores the boundaries of family, responsibility, honor, and trust. In the wake of the Civil War, Captain Jefferson Kyle Kidd travels through northern Texas, giving live readings from newspapers to paying audiences hungry for news of the world. An elderly widower who has lived through three wars and fought in two of them, the captain enjoys his rootless, solitary existence. In Wichita Falls, he is offered a \$50 gold piece to deliver a young orphan to her relatives in San Antonio. Four years earlier, a band of Kiowa raiders killed Johanna's parents and sister; sparing the little girl, they raised her as one of their own. Recently rescued by the U.S. army, the ten-year-old has once again been torn away from the only home she knows. Their 400-mile journey south through unsettled territory and unforgiving terrain proves difficult and at times dangerous. Johanna has forgotten the English language, tries to escape at every opportunity, throws away her shoes, and refuses to act "civilized." Yet as the miles pass, the two lonely survivors tentatively begin to trust each other, forming a bond that marks the difference between life and death in this treacherous land. Arriving in San Antonio, the reunion is neither happy nor welcome. The captain must hand Johanna over to an aunt and uncle she does not remember—strangers who regard her as an unwanted burden. A respectable man, Captain Kidd is faced with a terrible choice: abandon the girl to her fate or become—in the eyes of the law—a kidnapper himself.

Ancient Times

A prescient warning of a future we now inhabit, where fake news stories and Internet conspiracy theories play to a disaffected American populace —A glorious book . . . A spirited defense of science . . . From the first page to the last, this book is a manifesto for clear thought. —Los Angeles Times How can we make intelligent decisions about our increasingly technology-driven lives if we don't understand the difference between the myths of pseudoscience and the testable hypotheses of science? Pulitzer Prize-winning author and distinguished astronomer Carl Sagan argues that scientific thinking is critical not only to the pursuit of truth but to the very well-being of our democratic institutions. Casting a wide net through history and culture, Sagan examines and authoritatively debunks such celebrated fallacies of the past as witchcraft, faith healing, demons, and UFOs. And yet, disturbingly, in today's so-called

information age, pseudoscience is burgeoning with stories of alien abduction, channeling past lives, and communal hallucinations commanding growing attention and respect. As Sagan demonstrates with lucid eloquence, the siren song of unreason is not just a cultural wrong turn but a dangerous plunge into darkness that threatens our most basic freedoms. Praise for *The Demon-Haunted World* "Powerful . . . A stirring defense of informed rationality. . . Rich in surprising information and beautiful writing." *The Washington Post Book World* "Compelling." *USA Today* "A clear vision of what good science means and why it makes a difference. . . A testimonial to the power of science and a warning of the dangers of unrestrained credulity." *The Sciences* "Passionate." *San Francisco Examiner-Chronicle*

Revelation

This is a book about a box that contained the world. The box was the *Picture Academy for the Young*, a popular encyclopedia in pictures invented by preacher-turned-publisher Johann Siegmund Stoy in eighteenth-century Germany. Children were expected to cut out the pictures from the *Academy*, glue them onto cards, and arrange those cards in ordered compartments—the whole world filed in a box of images. As Anke te Heesen demonstrates, Stoy and his world in a box epitomized the Enlightenment concern with the creation and maintenance of an appropriate moral, intellectual, and social order. The box, and its images from nature, myth, and biblical history, were intended to teach children how to collect, store, and order knowledge. te Heesen compares the *Academy* with other aspects of Enlightenment material culture, such as commercial warehouses and natural history cabinets, to show how the kinds of collecting and ordering practices taught by the *Academy* shaped both the developing middle class in Germany and Enlightenment thought. *The World in a Box*, illustrated with a multitude of images of and from Stoy's *Academy*, offers a glimpse into a time when it was believed that knowledge could be contained and controlled.

The World Is Flat [Further Updated and Expanded; Release 3.0]

Now available as an ebook for the first time ever in America, the bestselling coming-of-age classic novel by John Irving—the 40th anniversary edition with a new introduction by the author. “He is more than popular. He is a Populist, determined to keep alive the Dickensian tradition that revels in colorful set pieces and teaches moral lessons.” The New York Times The opening sentence of John Irving’s breakout novel The World According to Garp signals the start of sexual violence, which becomes increasingly political. “Garp’s mother, Jenny Fields, was arrested in Boston in 1942 for wounding a man in a movie theater.” Jenny is an unmarried nurse; she becomes a single mom and a feminist leader, beloved but polarizing. Her son, Garp, is less beloved, but no less polarizing. From the tragicomic tone of its first sentence to its mordantly funny last line—“we are all terminal cases”—The World According to Garp maintains a breakneck pace. The subject of sexual hatred—of intolerance of sexual minorities and differences—runs the gamut of “lunacy and sorrow.” Winner of the National Book Award, Garp is a comedy with forebodings of doom. In more than thirty languages, in more than forty countries—with more than ten million copies in print—Garp is the precursor of John Irving’s later protest novels.

A Child's History of the World

Biblical Christianity is more than just another private religious view. It's more than just a personal relationship with God or a source of moral teaching. Christianity is a picture of reality. It explains why the world is the way it is. When the pieces of this puzzle are properly assembled, we see the big picture clearly. Christianity is a true story of how the world began, why the world is the way it is, what role humans play in the drama, and how all the plotlines of the story are resolved in the end. In The Story of Reality Study Guide, together with the accompanying Story of Reality and Story of Reality Video Study, bestselling author and host of Stand to Reason Gregory Koukl explains the words that form the narrative backbone of the Christian story. Each session identifies the most important things that happen in the

story in the order they take place, beginning with an examination of reality, and God, and moving through man, Jesus, the cross, and resurrection. If you are already a Christian, do you know and understand the biblical story? For those still seeking answers to the questions of life, this is an invitation to join a story that explains the world in a way nothing else will. Be a part of the story that can change your life forever.

A World Undone

"They are a mythical people, almost an imagined people," writes Mark Kurlansky. Settled in a corner of France and Spain in a land marked on no maps except their own, the Basques are a nation without a country, whose ancient and dramatic story illuminates Europe's own saga. Where did they come from? Signs of their civilization exist well before the arrival of the Romans in 218 B.C., and their culture appears to predate all others in Europe. Their mysterious and forbidden tongue, Euskera, is related to no other language on Earth. The Basques have stubbornly defended their unique culture against the Celts, the Romans, the Visigoths and Moors, the kings of Spain and France, Napoleon, Franco, the modern Spanish state, and the European Union. Yet as much as their origins are obscure, the Basques' contributions to world history have been clear and remarkable. Early explorers, they made fortunes whaling before the year 1000 and became the premier cod fishermen in Europe after discovering Canada's Grand Banks. Juan Sebastian de Elcano, a Basque, was the first man to circumnavigate the globe in 1522. Their influence has also been felt in religion as founders of the Jesuits in 1534, and in business, as leaders of the Industrial Revolution in southern Europe. Mark Kurlansky's passion for the Basque people, and his exuberant eye for detail, shine throughout this fascinating history. Like his acclaimed *Cod*, it blends human, economic, political, literary and culinary history into a rich and heroic tale. From the Hardcover edition.

History for the Classical Child

Children around the world know that to tell how old a tree is, you count its rings. Few people, however, know that research into tree rings has also made amazing contributions to our understanding of Earth's climate history and its influences on human civilization over the past 2,000 years. In her captivating new book, *Tree Story*, Valerie Trouet reveals how the seemingly simple and relatively familiar concept of counting tree rings has inspired far-reaching scientific breakthroughs that illuminate the complex interactions between nature and people. Trouet, a leading tree-ring scientist, takes us out into the field, from remote African villages to radioactive Russian forests, offering readers an insider's look at tree-ring research, a discipline formally known as dendrochronology. Tracing her own professional journey while exploring dendrochronology's history and applications, Trouet describes the basics of how tell-tale tree cores are collected and dated with ring-by-ring precision, explaining the unexpected and momentous insights we've gained from the resulting samples. Blending popular science, travelogue, and cultural history, *Tree Story* highlights exciting findings of tree-ring research, including the fate of lost pirate treasure, successful strategies for surviving California wildfire, the secret to Genghis Khan's victories, the connection between Egyptian pharaohs and volcanoes, and even the role of olives in the fall of Rome. These fascinating tales are deftly woven together to show us how dendrochronology sheds light on global climate dynamics and uncovers the clear links between humans and our leafy neighbors. Trouet delights us with her dedication to the tangible appeal of studying trees, a discipline that has taken her to austere and beautiful landscapes around the globe and has enabled scientists to solve long-pondered mysteries of Earth and its human inhabitants.

Tree Story
