Through the 1990s, a circle of ideas emerged relating three very different kinds of objects associated to a complex semisimple Lie algebra: nilpotent orbits, representations of a Weyl group, and primitive ideals in an enveloping algebra. The principal aim of this book is to collect together the important results concerning the classification and properties of nilpotent orbits, beginning from the common ground of basic structure theory. The techniques used are elementary and in the toolkit of any graduate student interested in the harmonic analysis of representation theory of Lie groups. The book develops the Dynkin-Konstant and Bala-Carter classifications of complex nilpotent orbits, derives the Lusztig-Spaltenstein theory of induction of nilpotent orbits, discusses basic topological questions, and classifies real nilpotent orbits. The classical algebras are emphasized throughout; here the theory can be simplified by using the combinatorics of partitions and tableaux. The authors conclude with a survey of advanced topics related to the above circle of ideas. This book is the product of a two-quarter course taught at the University of Washington.

Angel Beats!: Heaven's Door

In this provocative book, sixteen of Minnesota's best writers provide a range of perspectives on what it is like to live as a person of color in one of the whitest states in the nation. They give readers a splendid gift: the gift of touching another human being's inner reality, behind masks and veils and politeness. They bring us

generously into experiences that we must understand if we are to come together in real relationships. Minnesota communities struggle with some of the nation's worst racial disparities. As its authors confront and consider the realities that lie beneath the numbers, this book provides an important tool to those who want to be part of closing those gaps. With contributions by: Taiyon J. Coleman, Heid E. Erdrich, Venessa Fuentes, Shannon Gibney, David Grant, Carolyn Holbrook, IBé, Andrea Jenkins, Robert Karimi, JaeRan Kim, Sherry Quan Lee, David Mura, Bao Phi, Rodrigo Sanchez-Chavarria, Diane Wilson, Kao Kalia Yang

Your Lie in April

For all their spectacular growth, China and India must still lift a hundred million citizens out of poverty and create jobs for the numerous laborers. Both powers hope trade and investment will sustain national unity. For the first time, Jonathan Holslag identifies these objectives as new sources of rivalry and argues that China and India cannot grow without fierce contest. Though he recognizes that both countries wish to maintain stable relations, Holslag argues that success in implementing economic reform will give way to conflict. This rivalry is already tangible in Asia as a whole, where shifting patterns of economic influence have altered the balance of power and have led to shortsighted policies that undermine regional stability. Holslag also demonstrates that despite two decades of peace, mutual perceptions have become hostile, and a military game of tit-for-tat promises to diminish prospects for peace. Holslag therefore refutes the notion that development and interdependence lead to peace, and he does so by embedding rich empirical evidence within broader debates on international relations theory. His book is down-to-earth and realistic while also taking into account the complexities of internal policymaking. The result is a fascinating portrait of the complicated interaction among economic, political, military, and perceptual levels of diplomacy.

The Elf on the Shelf: A Christmas Tradition is an activity the entire family will enjoy. Based on the tradition Carol Aebersold began with her family in the 1970s, this cleverly rhymed children's book explains that Santa knows who is naughty and/or nice because he sends a scout elf to every home. During the holiday season, the elf watches children by day and reports to Santa each night. When children awake, the elf has returned from the North Pole and can be found hiding in a different location. This activity allows The Elf on the Shelf to become a delightful hide-and-seek game.

A Good Time for the Truth

"Anger is like a thorn in the heart the roar of my courage and the cold sweat of my fear." Luca Pyromania is an impulse control disorder [1] in which individuals repeatedly fail to resist impulses to deliberately start fires, [1] in order to relieve tension or for instant gratification. Damon DeLuca, or Luca as they called him. I thought of him more as Damien, the fucking devil within these walls that now is my life. Dark, broody, and deadly to any woman. Mind-blowing, soul-shaking, raw sex appeal. He was a tall statured boy with broad shoulders and a pair of green eyes that set my soul on fire. His inky black hair framed his hard, chiseled features. He had the type of body that had no business being on a seventeen-year-old. I knew that once he fully developed, he'd be nothing short of drop-dead gorgeous. As I said deadly on the eyes and dangerous for your heart. My name is Allison. I met Luca through an unfortunate event when we were younger. I'm now twenty-four, and this is my story. My fucked up life. It's not a pretty one. Then again, the most interesting ones aren't are they? This isn't your usual love story. Anything but. There are no blue skies, rainbows, or unicorns. Only his own personal arsonist. He had the ability to set my panties on fire, leave my body smoldering, and turn my heart into burning embers. He scared the hell out of me, made me feel. He opened my eyes to the world of twisted love. But love no less. This scary, beautiful man stole my heart from a young, tender age and refused to give it back. Here's our story This story is deep,

This New York Times bestselling Trump biography from a major American intellectual explains how a renegade businessman became one of the

most successful -- and necessary -- presidents of all time. In *The Case for Trump*, award-winning historian and political commentator Victor Davis Hanson explains how a celebrity businessman with no political or military experience triumphed over sixteen well-qualified Republican rivals, a Democrat with a quarter-billion-dollar war chest, and a hostile media and Washington establishment to become president of the United States -- and an extremely successful president. Trump alone saw a political opportunity in defending the working people of America's interior whom the coastal elite of both parties had come to scorn, Hanson argues. And Trump alone had the instincts and energy to pursue this opening to victory, dismantle a corrupt old order, and bring long-overdue policy changes at home and abroad. We could not survive a series of presidencies as volatile as Trump's. But after decades of drift, America needs the outsider Trump to do what normal politicians would not and could not do.

Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. *Strengthening Forensic Science in the United States: A Path Forward* provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. *Strengthening Forensic Science in the United States* gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.
